CHAPTER – V
CONCLUSION & SUGGESTIONS
CHAPTER V
CONCLUSION & SUGGESTIONS

All the governments, central, state and local- provides various services and amenities for better life and over all development of the people. Municipal administration in the county has established as to serve this purpose of urban people. The researcher focused on the role of Aurangabad municipal Administration by assessing the quality and quantity of services provided to the people in the city. The researcher has conducted the vast interviews of 260 citizens, 16 officials and 30 non-officials She also made an informal discussion with the respondents and observed the entire situation to fill the gaps of formal interviews.

Conclusions:

- There are one lakhs and five thousand domestic and 13,000 commercial tap connections in Aurangabad city. In spite of the fact citizens are not satisfied with drinking facility. 52 per cent citizens narrated that municipal corporation is not providing sufficient drinking water. The opinion of officials (15 percent) and non-officials (40 percent) regarding the issue, water supply section provide sufficient quantity of water to the people. They agreed to the fact that water pipe lines are old and not in a good condition, leakages’ might be there.

- Roads are the heart of city good roads is a sign of development. The condition of roads in the city is worst, except few roads. The ward members (34 per cent) opened the unfolded fact that funds
are not available to repair and construct the roads, whatever the roads are constructed in the city, the quality of construction is very poor. It is highly impossible to know whether the potholes are on roads or roads are in patholes.

- Street lights are necessary to avoid an accident. About 37 per cent street lights are either close or shocked. Most of the poles of lighting are rusted. Therefore the municipal administration has taken the decision to change the poles and bulbs (LED) or tubes instead of CFL.

- A good drainage system keep city clean and healthy. As per the information received from the municipal officials underground drainage system is available in Aurangabad city since 1975. As many as 59 per cent citizens don’t have the drainage facility either underground or open the people who are residing the slum areas are severely facing this problem. Drainages are choaked especially in rainy season and not to clean up is a serious issue for the people.

- Good sewage system is the basic need of every city. There are 66 big nalas in Aurangabad city. Aurangabad Municipal Corporation is entirely failed to manage the sewage system. The Administration left all the dirty water in Kham River which became a big ‘Nala’ in the city.

- Aurangabad municipal administration has the waste management mechanism. About 600 tones waste is collected daily out of which 450 tonnes waste collected by municipal administration and 150 tonnes waste is scattered here and there in the city. There are
“Ghanta Gadis” which collect the waste morning time. As many as 62 per cent citizens fully satisfied with the work of waste management. The municipal administration has purchased about 44 acre land at Naregon for dumping the collected waste from the city. The waste dumping depot of Aurangabad Municipal Corporation has become a serious headache for the Naregaon people.

- Availability of public toilets especially in the crowded area of the city has vital importance. The public toilets in the city helps to keep clean the public places. Aurangabad municipal administration has not given sufficient attention towards providing this facility to the people. Because as many as 77 per cent citizens have narrated that there are no public toilets in the city.

- “Health is wealth” is an old phrase. It is the responsibility of government to provide medical facilities to all the people by opening the government hospitals. According to Human Development Report there should be one hospital for 30,000 people in the city area. The population of Aurangabad city as per 2011 census is more than 13 lacks. There is a lack of hospitals in Aurangabad city commensurate with people. About 48 per cent peoples are far away to hospital facility. More of less officials and non- officials has the same opinion regarding the availability of public hospitals in the city. The services provided in the government hospitals is an another issue for discussion.

- The government of India has passed and enacted the Right to Education (RTE) Act to provide education for all the children (06-14 years) in the country. The local governments- rural and urban
also run the schools. There are 341 primary schools and 48 secondary schools which gives education in Marathi & Urdu medium in Aurangabad city. As many as 58 percent citizens told that the municipal schools are working to fulfill on the goals of Right To Education.

- Municipal Corporation also takes care of public health by fogging, spraying and about treatment. Presently the municipal corporation has failed to control the spread of mosquitoes diseases concerned.

- Peoples are equally responsible to spread various diseases and create unhealthy environment. Residents not covering stored water mosquitoes are born. Untreated in open containers, water, coolers and storage tanks are creating favorable conditions for the disease in Aurangabad city.

- Gardens plays important role in the beautification of city. Peoples especially at evening time come to the gardens and enjoy for few time. Aurangabad Municipal Corporation has 107 gardens. It is a fact that 70 per cent people are far away from the garden facility, About 30 per cent people frequently goes to the gardens; they are also not satisfied with the facilities available in different gardens in the city. Altogether the condition of all the gardens, more or less, worst.

- Public libraries are one of the important sources of dissemination of knowledge and information. As much as 70 per cent respondents are not getting the library facility.
• Municipal Corporation conserved the planting trees worst. As much as 68 percent respondents and 40 percents non-officials have the same opinioned about the protecting and conserving the trees.

• Recommendations:

1. They supply of drinking water should equal to all the citizens in the city. Municipal Corporation, to fulfill this aim, should fit the meters to drinking water tap.

2. Rain harvesting should be made compulsory for all the peoples in the city while giving the construction permission by municipal administration.

3. The municipal corporation must improve the quality of construction of roads by keeping strict control and minimizing the corruption, if.

4. It is necessary to restructure the street light. The researcher heard that the municipal corporation has taken the decision as to change the existing street light system. This work should be completed as early as possible.

5. The municipal corporation should formulate the policy and adopt S.T.P. & Bio Filter Technology to reuse of used water.

6. Sufficient public toilets should make available especially for women and it should construct on BOT basis.
7. The municipal corporation should take care while collecting the waste in the city. The wet waste should be separated from solid waste for its better disposal.

8. The municipal administration should spread the BSC powder as to control the diseases and protect public health. This activity should be undertaken twice to thrice in a weak.

9. The municipal corporation should construct ward wise libraries and it should be opened for 12 hours.

10. The municipal administration should appoint the residential doctors and health services should be provided for 24 hours.

11. Every official and non-official of Municipal Corporation must take the responsibility to plant ten trees on “World Environment Day” every year and protect it.

12. The official and non-official who protected the planted trees the Municipal Corporation should give tree protection award every year.

13. It is the moral responsibility of the people that they must extend their cooperation, participation and involvement in all the issues before Municipal Administration.

14. The Municipal Corporation should be maintained a ‘Complaint Box’. Before the meeting of general body the complaint box
should be opened and take the cognizance of all the complaints made by the people.

The recommendation made by the researcher is based on empirical data which collected from the respondents. The researchers feel that if the Municipal Corporation brings in practice the aforementioned recommendations the quality of services provided by Municipal Corporation will be definitely improved.
