CHAPTER – 1.	INTRODUCTION	1-52
1.1.1	Analytical Chemistry in Pharmaceutical industry	
1.1.2.	Qualitative Analysis	
1.1.3.	Quantitative analysis	
1.1.4.	GLP in analytical Laboratory	
1.1.5.	Calibration of analytical instruments	
1.1.6.	Analytical method development and validation	
1.1.7.	Method validation of analytical procedure	
1.1.8.	Advantages of analytical method validation	
1.1.9.	Important parameters of the analytical method validation	
1.1.10.	Importance of documentation	
1.1.11.	General Chromatography	
1.1.12.	Partition Chromatography	
1.1.13.	Normal phase chromatography	
1.1.14.	Displacement Chromatography	
1.1.15.	Reversed phase Chromatography (RPC)	
1.1.16.	Size exclusion chromatography	
1.1.17.	Ion exchange chromatography	
1.1.18.	Bioaffinity Chromatography	
1.1.19.	Theory of Chromatography	
1.1.20.	Ultra performance Liquid Chromatography (UPLC)	
1.1.21.	Different types of detectors used in HPLC and UPLC	
1.1.22.	Fundamental Parameters Used In Liquid Chromatography	
1.2.	Literature Survey	
1.2.1.	Artemether	
1.2.2.	Chemistry of Artemether	
1.2.3.	Objective of the work	
1.2.4.	Flucytosine	
1.2.5.	Chemistry of Flucytosine	
1.2.6.	Objective of the work	
1.2.7	Divalproex sodium	

- 1.2.8. Chemistry of Divalproex sodium
- 1.2.9. Objective of the work
- 1.2.10. Meclizine hydrochloride
- 1.2.11. Chemistry of Meclizine hydrochloride
- 1.2.12. Objective of the work
- 1.2.13. Zoledronic Acid
- 1.2.14. Chemistry of Zoledronic Acid
- 1.2.15. Objective of the work
- 1.2.16. References:

CHAPTER 2. EXPERIMENTAL 53-101

- 2.1.0 . Method Development and validation of Artemether
- 2.2.0. Method Development and validation of Flucytosine
- 2.3.0. Method Development and validation of Divalproex sodium
- 2.4.0 Method Development and validation of Meclizine hydrochloride
- 2.5.0. Method Development and validation of Zoledronic Acid
- 2.6.0 References:

CHAPTER 3. RESULTS 102-200

- 3. 1.1. Method validation Result of Artemether
- 3.2.2. Method validation Result of Flucytosine
- 3.3.3. Method validation Result of Divalproex sodium
- 3.4.4. Method validation Result of Meclizine hydrochloride
- 3.5.5 Method validation Result of Zoledronic Acid

CHAPTER - 4. DISCUSSION 201-243

- 4.1.1. Method validation Discussion of Artemether
- 4.1.2. Method validation Discussion of Flucytosine
- 4.1.3. Method validation Discussion of Divalproex sodium
- 4.1.4. Method validation Discussion of Meclizine hydrochloride
- 4.1.5. Method validation Discussion of Zoledronic Acid.
- 4.1.6. REFERENCE

5.0. SUMMARY AND CONCLUSION 244-245

List of Publications 246-247
