ACKNOWLEDGEMENTS

The author is very much grateful to his Supervisor Dr.S.Renganarayanan, Professor of Mechanical Engineering for his scholarly advises, valuable suggestions and inspiring guidance during the course of the research work.

The author wishes to place on record his deep sense of gratitude to his original supervisor Dr.A.Kalanidhi, Professor of Mechanical Engineering; presently serving as Adviser, AICTE, for introducing him to this research area, motivating and giving directions to progress.

The author is thankful to the Doctoral Committee Members, Dr.V.M.Krishna Shastri and Dr.S.Srinivasamurthy, I.I.T., Chennai for their guidance and support.

The support of M/s.Tribology India Ltd. Chennai, M/s.Addison Tools Ltd. Chennai, IGCAR Kalpakkam, I.I.T. Chennai, VSSC Trivandrum for the experimental work in this research work are sincerely acknowledged. The fruitful deliberations with Dr.V.S.Raghunathan, IGCAR and Dr.N.Krishnaraj, Mr.Durgaramsingh and Mr.Nedumaran of M/S Tribology India Ltd were of immense use in carrying out the experimentations.

The author is indebted to Dr. Anand.A.Samuel Professor -in-charge R & AC lab for the constant encouragement and the facilities extended to carry out this research work. The author acknowledges the help rendered by Dr.S.Iniyan and Dr.L.Suganthy as and when required.
The author wishes to sincerely thank Dr. K. Chandrasekaran, for extending the facilities of the AU-FRG centre for CAD / CAM to carry out the numerical analysis which is a part of this research work.

The fruitful discussions with Dr. C. Jebaraj, Dr. B. Nagabushna Rao and Mr. K. Lakshmi Narayanan were of immense use for the numerical analysis.

The author wishes to thank Dr. K. Rajendran and Dr. K. V. Sathiaraj, Professors of Mechanical Engineering for extending the facilities of Central Workshop and that of Manufacturing Engineering Division respectively to carry out some of the experimental work.

The timely help rendered by Dr. T. Jaya Shobaneswari for carrying out the language corrections in this thesis is deeply appreciated and the author is thankful for the same.

The author acknowledges the help and support of Ms. V. Sujatha in preparing this thesis.

The author wishes to express his heartfelt thanks to all his friends and colleagues who helped during this work.

Last but not the least the author acknowledges the support and motivation of his family members, Parents and in-laws for completing this research programme.
