ACKNOWLEDGEMENT

The author recollects the experience, enjoyment and encouragement he had during the M.Sc project work in Crystal Growth at Alagappa College Campus. For anything, irrespective of the nature of field, whether it is hard or easy one needs the above said factors, particularly to venture into new research problems, which forms the initial success. The author still remembers the encouragement and patient scientific advice he had at the time of frustration due to the fusing of the furnace many times, during the M.Sc. project work. The author feels that the above experience laid a strong foundation for this thesis work and greatly indebted to the Supervisor Dr. F.D. GNANAM, Reader, Crystal Growth Centre, Anna University, Madras. His encouragement, critical suggestions and scientific proficiency have made bringforth this thesis to a completion.

Words are inadequate and ineffective to express gratitude to the Co-Supervisor Prof. P. RAMASAMY, Crystal Growth Centre, who introduced the author to the field of Crystal Growth during M.Sc. project work. His critical comments, personal help, encouragement as well as Scholarly advice have proved invaluable indeed.

The author thanks University Grants Commission for the financial support to carry out this work and this funding, which was generated through the efforts of Dr. F.D. Gnanam and Prof. P. Ramasamy, is gratefully acknowledged. The author is very much thankful to the authorities of Anna University, for providing excellent facilities to carry out this work.
The author is very much thankful to his parents, brothers, sisters and Mr. Gangadaran and his family for their kind co-operation and moral encouragement to carry out this work.

The help rendered by Dr. R. Gobinathan, Reader in physics, Crystal Growth Centre, at the start of the work and his advice is gratefully acknowledged. The author wishes to thank Dr. C. Subramanian, Reader in physics and Dr. R. Dhanasekaran, Lectures in Physics for their encouragement and interest in this work.

Useful discussions, critical comments and help by Mr. S. Anbukumar, Mr. M. Thirumavalavan, Mr. L. Dural, Mr. J. Kumar, Mr. G. Malayappan, Mr. V. Natarajan, Mr. B. Vengadesan, Mr. V.N. Mani, Mr. K. Baskar, Mr. S. Sivanesan and particularly Prof. L. Palaniyappan have made the research experience so precious and exciting to the author. The help by Mr. V. Narayanan, Dept. of Inorganic Chemistry, and Mr. J. Nandagopal, Dept. of Analytical Chemistry, Madras University in the preparation and analysis of the compounds is gratefully acknowledged.

The author appreciates and thanks Dr. S. Vasudevan, Nandanam Arts College, Madras, for his excellent photography.

Useful discussions and help in SEM analysis by Dr. G. Salviatti, Maspec, CNR-Italy is gratefully acknowledged.

The author also wishes to thank Mr. M. Sheik, glass blower, ACT, Madras, Mr. V. Sivanandam RSIC, Madras Mr. K.S. Madhavudi, Dept. of Geology for the excellent printing of the photos and Mrs. Indira Yuvaraj for her neat line drawings.
Finally, the author thanks Miss. S. Daphne for neatly typing this thesis.
