ACKNOWLEDGEMENT

I am deeply indebted to Dr. T.R. JAGADEESAN, Director, College of Engineering, under whose initiative and excellent guidance, the research was carried out. My profound thanks are also due to him for his never ending help and continuous encouragement at all stages of the research and also during the preparation of this thesis.

My sincere thanks to the Professors, Colleagues and Friends of the College of Engineering for their varied help during this work. My thanks are also due for making available the computer facility at the Centre for New and Renewable Sources of Energy, College of Engineering.

I also thank the Council for Scientific and Industrial Research, New Delhi, India, for offering financial assistance in carrying out the research at the College of Engineering, Anna University.

I thank Coal India Ltd., IFMR, CII and RBI, for helping me procure the necessary data required for the study.

My special thanks to everyone, who had helped me directly or indirectly in completing this assignment.
