I am indebted to Dr. R. Balakrishnan, Lecturer in Physics, Kanchi Mamunivar Centre for Post-Graduate Studies, Pondicherry, under whose guidance and supervision the investigations reported in this thesis were carried out.

Dr. Saroja Sundararajan, Director, KMCPGS, has been a great source of inspiration by her academic excellence, and her timely administrative help has helped complete this work. I am grateful to this distinguished scholar.

My sincere thanks are due to Prof. V.K. Sankaran, Head of the Department of Physics, KMCPGS, and the other teachers in the department for the keen interest shown and the encouragement provided by them while this work was in progress.

I also thank Mr. M. Vallathan and the support staff of Rank Computers, Pondicherry, who, with great patience, typed the manuscript excellently. The entire typing work was done under the supervision of Mr. S. Ramadasse, Lecturer in Physics, Bharathidasan Govt. College for Women, Pondicherry, and all the related matters were organized by him. My sincere thanks are due to him also.

It is an art to correct, edit, and give a pre-planned format to a matter entered using a software package into computer. I have, among my friends, skilled artists in this field. These include the following, who did the work with patience, care and understanding: E. Ilavarasan, Z. Olirvel, Lecturers in Computer Science, BGCW, A. Premkumar Julien and J. Nadarajan, Lecturers in Zoology, BGCW and G. Rathinavelou, Research Assistant in the Department of Physics, Pondicherry University. I would love to record my deeply-felt gratitude to these friends of mine.
I would be failing in my duty if I do not thank Prof. B. Sukumaran Nair and his team of teachers in the Department of Physics, Mahatma Gandhi Govt. Arts College, Mahe, who shared my work load in the department in my absence during the final stages of my research work.

A friend in need is a friend indeed. Mr. K. Srinivasa Raghavan, Lecturer in Physics, BGCW has the rare quality and ability to try to cater to any need of a friend. I have benefited most from his rarity especially during the final stages of the preparation of the thesis and I express my deep sense of gratitude to him.

The financial and administrative help by the University Grants Commission and the Department of Education, Govt. of Pondicherry is acknowledged with thanks.

Finally, I express my deep appreciation to my wife and other members of my family for their patience and encouragement, without which this work might never have been completed.
