

LIST OF TABLES

Table No.	Title	Page
2.1	Comparison of the similar and difference between theory X, Y and Z	24
2.2	Four systems of Likert's theory	53
3.1	Number of statements included in each aspect in the preparation form of the scale which measures the efficient participative management system	134
3.2	Number of statements included in each aspect in the pre-pilot form of the scale which measures the efficient participative management system	135
3.3	List of judges and number of booklets were accepted	137
3.4	Index of item objectives congruence (IOC) of each statement included in the scale which measures the efficient participative management system	139
3.5	Number of statements included in each aspect in the pilot form of the scale which measures the efficient participative management system	148
3.6	Number of physical education teachers selected for the administration of the pilot form of the scale	150
3.7	Construct validity of the scale which measures the efficient participative management system	154
3.8	Discrimination value of the statements in the scale which measures the efficient participative management system	161
3.9	Test-retest reliability of the scale which measures the efficient participative management system	174
3.10	Number of statements included in the final form of the scale which measures the efficient participative management system	175
3.11	Number of physical education teachers in physical education institutes (PEIs)	177
3.12	Number of selected physical education institutes and number of physical education teachers	179

LIST OF TABLES (Continued)

Table No.	Title	Page
3.13	Number of selected physical education teachers in each physical education institutes	180
3.14	Classification of the sample according to variables	181
3.15	Criteria of the level of the efficient participative management system	183
4.1	Mean and standard deviation of the efficient participative management system (N = 372)	191
4.2	Summary of the mean scores of the efficient participative management system in total score and in different aspects	200
4.3	Mean and standard deviation of the efficient participative management system in total score and in different aspects rated by male and female physical education teachers	202
4.4	Mean and standard deviation of the efficient participative management system in total score and in different aspects rated by physical education teachers belonging to different groups of age	206
4.5	Mean and standard deviation of the efficient participative management system in total score and in different aspects rated by physical education teachers belonging to different groups of educational qualification	211
4.6	Mean and standard deviation of the efficient participative management system in total score and in different aspects rated by physical education teachers belonging to different groups of teaching experience	216
4.7	Significant difference between scores of the efficient participative management system (total score) rated by physical education teachers classified by sex	221
4.8	Significant difference between scores of the efficient participative management system (leadership process) rated by physical education teachers classified by sex	222

LIST OF TABLES (Continued)

Table No.	Title	Page
4.9	Significant difference between scores of the efficient participative management system (motivational forces) rated by physical education teachers classified by sex	223
4.10	Significant difference between scores of the efficient participative management system (communication process) rated by physical education teachers classified by sex	224
4.11	Significant difference between scores of the efficient participative management system (interaction influence process) rated by physical education teachers classified by sex	225
4.12	Significant difference between scores of the efficient participative management system (decision making process) rated by physical education teachers classified by sex	226
4.13	Significant difference between scores of the efficient participative management system (goal setting process) rated by physical education teachers classified by sex	227
4.14	Significant difference between scores of the efficient participative management system (controlling process) rated by physical education teachers classified by sex	228
4.15	Summary of the results of ANOVA for of the efficient participative management system (total score) rated by physical education teachers belonging to different groups of age	229
4.16	Summary of studentized range statistics test (q) applied to ANOVA for different pairs of mean scores of the efficient participative management system (total score) rated by physical education teachers belonging to different groups of age	230
4.17	Summary of the results of ANOVA for of the efficient participative management system (leadership process) rated by physical education teachers belonging to different groups of age	231

LIST OF TABLES (Continued)

Table No.	Title	Page
4.18	Summary of studentized range statistics test (q) applied to ANOVA for different pairs of mean scores of the efficient participative management system (leadership process) rated by physical education teachers belonging to different groups of age	232
4.19	Summary of the results of ANOVA for of the efficient participative management system (motivational forces) rated by physical education teachers belonging to different groups of age	233
4.20	Summary of studentized range statistics test (q) applied to ANOVA for different pairs of mean scores of the efficient participative management system (motivational forces) rated by physical education teachers belonging to different groups of age	234
4.21	Summary of the results of ANOVA for of the efficient participative management system (communication process) rated by physical education teachers belonging to different groups of age	235
4.22	Summary of studentized range statistics test (q) applied to ANOVA for different pairs of mean scores of the efficient participative management system (communication process) rated by physical education teachers belonging to different groups of age	236
4.23	Summary of the results of ANOVA for of the efficient participative management system (interaction influence process) rated by physical education teachers belonging to different groups of age	237
4.24	Summary of studentized range statistics test (q) applied to ANOVA for different pairs of mean scores of the efficient participative management system (interaction influence process) rated by physical education teachers belonging to different groups of age	238

LIST OF TABLES (Continued)

Table No.	Title	Page
4.25	Summary of the results of ANOVA for of the efficient participative management system (decision making process) rated by physical education teachers belonging to different groups of age	239
4.26	Summary of studentized range statistics test (q) applied to ANOVA for different pairs of mean scores of the efficient participative management system (decision making process) rated by physical education teachers belonging to different groups of age	240
4.27	Summary of the results of ANOVA for of the efficient participative management system (goal setting process) rated by physical education teachers belonging to different groups of age	241
4.28	Summary of studentized range statistics test (q) applied to ANOVA for different pairs of mean scores of the efficient participative management system (goal setting process) rated by physical education teachers belonging to different groups of age	242
4.29	Summary of the results of ANOVA for of the efficient participative management system (controlling process) rated by physical education teachers belonging to different groups of age	243
4.30	Summary of studentized range statistics test (q) applied to ANOVA for different pairs of mean scores of the efficient participative management system (controlling process) rated by physical education teachers belonging to different groups of age	244
4.31	Significant difference between scores of the efficient participative management system (total score) rated by physical education teachers classified by educational qualification	245
4.32	Significant difference between scores of the efficient participative management system (leadership process) rated by physical education teachers classified by educational qualification	246

LIST OF TABLES (Continued)

Table No.	Title	Page
4.33	Significant difference between scores of the efficient participative management system (motivational forces) rated by physical education teachers classified by educational qualification	247
4.34	Significant difference between scores of the efficient participative management system (communication process) rated by physical education teachers classified by educational qualification	248
4.35	Significant difference between scores of the efficient participative management system (interaction influence process) rated by physical education teachers classified by educational qualification	249
4.36	Significant difference between scores of the efficient participative management system (decision making process) rated by physical education teachers classified by educational qualification	250
4.37	Significant difference between scores of the efficient participative management system (goal setting process) rated by physical education teachers classified by educational qualification	251
4.38	Significant difference between scores of the efficient participative management system (controlling process) rated by physical education teachers classified by educational qualification	252
4.39	Summary of the results of ANOVA for of the efficient participative management system (total score) rated by physical education teachers belonging to different groups of teaching experience	253
4.40	Summary of studentized range statistics test (q) applied to ANOVA for different pairs of mean scores of the efficient participative management system (total score) rated by physical education teachers belonging to different groups of teaching experience	254
4.41	Summary of the results of ANOVA for of the efficient participative management system (leadership process) rated by physical education teachers belonging to different groups of teaching experience	255

LIST OF TABLES (Continued)

Table No.	Title	Page
4.42	Summary of studentized range statistics test (q) applied to ANOVA for different pairs of mean scores of the efficient participative management system (leadership process) rated by physical education teachers belonging to different groups of teaching experience	256
4.43	Summary of the results of ANOVA for of the efficient participative management system (motivational forces) rated by physical education teachers belonging to different groups of teaching experience	257
4.44	Summary of studentized range statistics test (q) applied to ANOVA for different pairs of mean scores of the efficient participative management system (motivational forces) rated by physical education teachers belonging to different groups of teaching experience	258
4.45	Summary of the results of ANOVA for of the efficient participative management system (communication process) rated by physical education teachers belonging to different groups of teaching experience	259
4.46	Summary of studentized range statistics test (q) applied to ANOVA for different pairs of mean scores of the efficient participative management system (communication process) rated by physical education teachers belonging to different groups of teaching experience	260
4.47	Summary of the results of ANOVA for of the efficient participative management system (interaction influence process) rated by physical education teachers belonging to different groups of teaching experience	261
4.48	Summary of studentized range statistics test (q) applied to ANOVA for different pairs of mean scores of the efficient participative management system (interaction influence process) rated by physical education teachers belonging to different groups of teaching experience	262

LIST OF TABLES (Continued)

Table No.	Title	Page
4.49	Summary of the results of ANOVA for of the efficient participative management system (decision making) rated by physical education teachers belonging to different groups of teaching experience	263
4.50	Summary of studentized range statistics test (q) applied to ANOVA for different pairs of mean scores of the efficient participative management system (decision making) rated by physical education teachers belonging to different groups of teaching experience	264
4.51	Summary of the results of ANOVA for of the efficient participative management system (goal setting process) rated by physical education teachers belonging to different groups of teaching experience	265
4.52	Summary of studentized range statistics test (q) applied to ANOVA for different pairs of mean scores of the efficient participative management system (goal setting process) rated by physical education teachers belonging to different groups of teaching experience	266
4.53	Summary of the results of ANOVA for of the efficient participative management system (controlling process) rated by physical education teachers belonging to different groups of teaching experience	267
4.54	Summary of studentized range statistics test (q) applied to ANOVA for different pairs of mean scores of the efficient participative management system (controlling process) rated by physical education teachers belonging to different groups of teaching experience	268
