ACKNOWLEDGEMENTS

The utmost acknowledgement goes to the GOD. He blessed me with very good opportunities in my life, one of which was to carry out this research work under kind guidance of Dr. (Mrs.) S. Manocha and Dr. L. M. Manocha.

I owe my deepest debt of gratitude to Dr. (Mrs.) S. Manocha, Professor, Department of Materials Science, Sardar Patel University, Vallabhbh Vidyanagar under whom I had the opportunity of working as a research student. I am deeply indebted to Prof. (Mrs.) S. Manocha for important and stimulating ideas providing by her. Time to time discussions with her gave me invaluable help in organization of the experimental work, interpretation of the results and in writing the thesis. She gave me a much needed moral support when things were ups and downs. The years spent in her counsel and company will have a lasting positive impact on my professional career. I would like to express my gratitude for her care, help and guidance.

I am indebted to Dr. L. M. Manocha, Professor and Head, Department of Materials Science, Sardar Patel University, Vallabhbh Vidyanagar, for his day to day guidance in every aspect of life. I'm also benefited by his constructive criticism which made me aware of so many basic aspects of science and its application to the experimental work and in routine life which was indeed very central to one's understanding of the subject. This thesis is an outcome of his binding concern, support and valuable suggestions. I would like to express my gratitude for his help and guidance.
I sincerely thank my colleagues and friends Dr. Ashish Warrier, Dr. Jignesh Valand, Dr. Raviraj Shah, Dr. Narendra Movaliya, Dr. Bharat Patel, Dr. Rakesh Patel, Mr. Rakesh Raj, Mr. Nilesh Parmar, Mr. Harshad Patel, Mr. Amit Brahmbhatt, Mr. Rajesh Pande, Mr. Imad Ali Disher, Mr. Vishal Makadiya, Mr. Niladri Vyas and Mr. Hemang Patel for their timely help, support and fruitful discussion during and towards successful completion of my research work.

I am thankful to non-teaching staff Mr. S. A. Barot, Mr. B. D. Meheriya, Mr. R. M. Rana, Mr. Hardhik Shah, Mr. Anton Mackwan and Mrs. Parul Sheth for their constant co-operation.

I am grateful to the University Grants Commission (UGC), New Delhi, for providing me financial assistance as a Project Fellow under UGC Major Research Project entitled “Treatment of layered materials (clay) as nanophase reinforcement for enhancement of thermomechanical properties of polymer composites” (F-12-28/2004 (SR)/January, 2004) for the duration 4.6.2004 to 31.5.2007.

I am also grateful to the University Grants Commission (UGC) for providing me fellowship under its Meritorious students scheme to the Department of Materials Science.

I am heartily thankful to Dr. (Mrs.) Veena Choudhary, Professor and Head, Centre for Polymer Science and Engineering, IIT, New Delhi for providing their processing facilities and stimulating ideas for polymer/organoclay nanocomposites.

I am heartily thankful to Dr. B. V. Ankleswariya, former General Manager, Research Centre, GSFC, Vadodara, Dr. Y. P. Sing, Research Centre, GSFC,
Vadodara, and Mr. D. P. Shah, Research Centre, GSFC, Vadodara, for providing their processing and characterization facilities for Nylon 6/organoclay nanocomposites.

I am also thankful to the Sophisticated Instrumentation Center for Advance Research and Testing (SICART-CVM), Vallabh Vidyanagar, for XRD analysis of various clay and polymer nanocomposites samples.

The words are insufficient to express my gratitude to my beloved parents Shri Arvindbhai G. Patel and Smt. Jashodaben A. Patel. The present work would not have been possible without their indispensable help, unlimited patience and affection full of constant encouragement in all my endeavours. Affection full of constant co-operation and encouragement from my loving elder brother Dr. Dharmesh Patel and from my Swetabhabhi has been valuable support to me. I wish to express my deepest appreciation to my wife Jigna for her love, understanding, patience and full support throughout my research work. I'm very grateful to my sweet and lovely niece Anjani and nephew Jap whose innocent smile always makes me feel happy. As I believe, is a cause for a successful completion of my research work.

Last but not least, with deep and heartiest sense of gratitude I thank my mentor Dr. (Mrs.) S. Manocha and Dr. L. M. Manocha for their love, blessings and inspiration.

Nikesh A. Patel
Research Student
