CONTENTS

CHAPTER-1

Introduction 1 – 44
Occurrence and Structure of Xylans 4
Xylanolytic Enzymes 7
Production of Xylanases 11
Purification and Properties of Xylanases 17
Regulation of Xylanase Synthesis 22
Gene Cloning and Protein Engineering of Xylanases 25
Biotechnological Applications of Xylanases 27
References 35

CHAPTER-2

Screening and Isolation of Xylanolytic Microorganisms and Xylanase Production by Submerged Fermentation 45 – 76
Introduction 45
Materials and Methods 47
Results and Discussion 51
References 70

CHAPTER-3

Production of Xylanase by Solid State Fermentation 77 – 107
Introduction 77
Materials and Methods 78
Results and Discussion 82
References 102
CHAPTER-4
Partial Purification and Characterization of Xylanases 108 - 144
Introduction 108
Materials and Methods 109
Results and Discussion 115
References 139

CHAPTER-5
Biotechnological Applications of Xylanases 145 - 176
Introduction 145
Materials and Methods 149
Results and Discussion 153
References 172

Summary and Conclusion 177 - 183
