Acknowledgements

I would like to humbly thank and express my heartfelt gratitudes to my esteemed supervisors, Dr. T D Pawar, Head- Department of Electronics Engineering, Birla Vishwakarma Mahavidyalaya and Dr. V K Thakar, Head- Department of Electronics & Communication Engineering, A D Patel Institute of Technology for their continuous support and encouragement extended to me during the entire tenure of this work. I have had many thought-provoking and fruitful technical discussions with them and each one of those had boosted me to do better. My supervisors not only provided the technical insights of the research topic, but also helped me to develop many characteristics like patience, persistence and hardwork.

I am extremely thankful and highly obliged to the Board of Management, Charutar Vidyamandal and Dr. C L Patel, in particular, who has approved my application for higher studies in no time and provided me the opportunity to pursue Ph. D. I am also thankful to Dr. V S Patel, Director- Sophisticated Instrumentation Centre for Advanced Research and Testing (SICART) for providing all infrastructural facilities for carrying out this research work.

I would like to thank Dr. Himanshu Soni, Principal and Dr. Bhaskar Thakkar, Head of EC Department of G H Patel College of Engineering & Technology (GECT) for extending their help, support and necessary relaxations to me as and when required in a friendly manner. I would also like to express my deep sense of gratitude towards all teaching and non teaching staff members of EC Department as well as GCET who were ready to help in all possible manners.

At this moment I cannot resist myself to be bit emotional and expressing my gratifications to all family members-- my respectable mother Dr. Usha K. Kher, my beloved wife Heena Kher and my dearest son ATHARV-- without whose continuous support and love it was not only difficult but impossible to carry out this work. They were right besides me in all ups and downs during this mammoth task. I would also like to remember and pay my homage to my father late Kiransinh D. Kher at this moment and pray to almighty for the eternal peace of his soul.

The acknowledgments would be incomplete if I don’t thank all my well-wishers and friends for their support and warmth extended to me. I am also thankful to the one and all who have helped me directly or indirectly during this work.

Above all, I would like to thank the Almighty GOD for providing me enough strength, courage and patience during the entire work.
