

INDEX

Greetings	I - III	
Abstract	IV - VI	
Chapter 1	General Introduction	1 - 25
1.1	Thin Film Technology	1
1.2	Metal Semiconductor (Schottky Barrier) Junction	2
1.3	Aims And Objective Of The Present Work	4
1.4	Transition Metal Dichalcogenides - Brief Over View	6
1.4.1	Lattice Structure Of TMDCs	7
1.4.2	Electronic Structure Of TMDCs	9
1.5	Earlier Work On Structural, Physical, Optical And Electrical Properties Of WSe ₂ :An Overview	10
1.5.1	Structure of Tungsten Diselenide	10
1.5.2	Physical Properties Of Tungsten Diselenide	12
1.5.3	Optical Properties Of Tungsten Diselenide	13
1.5.4	Electrical Properties Of Tungsten Diselenide	14
1.5.5	Brief Review Of Research Works On Schottky Barriers And Heterojunctions With WSe ₂	16
	References	18
Chapter 2	Growth And Chemical Composition Of WSe₂ Thin Films	26 - 56
2.1	Introduction	26
2.2	Thin Film Preparation Techniques	28
2.2.1	Vacuum Evaporation	29
2.2.1.1	Thermal evaporation	30
2.2.1.2	Flash evaporation	30
2.2.1.3	Electron beam evaporation	31
2.2.1.4	Laser evaporation	31
2.2.1.5	Arc evaporation	31
2.2.1.6	Radio frequency heating	32
2.2.2	Sputtering	32
2.2.2.1	Glow discharge DC sputtering	32
2.2.2.2	Triode sputtering	33
2.2.2.3	Radio frequency sputtering	33
2.2.2.4	Magnetron sputtering	34
2.2.2.5	Ion beam sputtering	34
2.2.3	Chemical Methods Of Film Deposition	35
2.2.3.1	Chemical vapor deposition	35
2.2.3.2	Electroless deposition	36
2.2.3.3	Electrodeposition	36
2.2.3.3.1	Anodic deposition	36
2.3	Review Of WSe ₂ Thin Film Preparation Techniques	37
2.3.1	Choice Of Deposition Technique	37
2.3.2	Requirements Of The Thermal Evaporation Technique	39

2.4	Thin Film Preparation	43
2.4.1	By Thermal Evaporation	43
2.4.2	By Flash Evaporation	44
2.4.3	By Electron Beam Evaporation	46
2.5	Results And Discussions	47
2.5.1	EDAX Analysis Of WSe ₂ Reactive Powder	47
2.5.2	EDAX Analysis Of Thermally Evaporated WSe ₂ Thin Film	48
2.5.3	EDAX Analysis Of Flash Evaporated WSe ₂ Thin Film	51
2.5.4	EDAX Analysis Of e ⁻ - Beam Evaporated WSe ₂ Thin Film	52
2.6	Conclusions	53
	References	54
Chapter 3	Structural And Microscopic Studies Of WSe₂ Thin Films	57-90
3.1	Structural Properties Of The Grown WSe ₂ Thin Films	57
3.1.1	X-Ray Diffraction (XRD)	57
3.1.1.1	X-ray diffraction data acquisition and analysis	61
3.1.1.2	Analysis of X - ray diffractogram	63
3.1.1.2.1	Lattice parameters	67
3.1.2	Electron Diffraction By Transmission Electron Microscope	74
3.1.2.1	Analysis of electron diffraction pattern of WSe ₂ thin films	76
3.2	Surface And Morphological Study Of WSe ₂ Thin Films	79
3.2.1	Surface Study By Scanning Electron Microscope	79
3.2.2	Roughness Measurement By Atomic Force Microscopy (AFM)	81
3.3	Conclusions	87
	References	88
Chapter 4	Optical Absorption Study Of WSe₂ Thin Films	91 - 118
4.1	Introduction	91
4.2	UV - VIS - NIR Spectroscopy	98
4.2.1	Experimental Method	100
4.2.2	Determination Of Optical Bandgap	101
4.3	Results And Discussion	102
4.4	Summary And Conclusions	114
	References	115
Chapter 5	Electrical Transport Properties Of WSe₂ Thin Films	119 - 154
5.1	Introduction	119
5.2	Hall Effect Measurement	120
5.2.1	Sample Preparation For Hall Effect Measurement	125
5.2.2	Hall Effect Measurement Setup	125
5.3	Results And Discussion	129
5.3.1	Temperature Dependence Of Resistivity And Carrier Density	136
5.4	Thermoelectric Power Measurement	142
5.4.1	Thermoelectric Power Measurement Setup	142
5.4.2	Experimental Procedure	145

5.4.3	Results And Discussion	146
5.5	Conclusions	150
	References	152
Chapter 6	Preparation and Characterization of Metal – Semiconductor Rectifying Contacts	155 - 218
6.1	Introduction	155
6.2	Ohmic Contacts	156
6.2.1	Ohmic Contact With Small Work Function Metal	157
6.2.2	Ohmic Contact With Tunneling Current Mechanism	158
6.3	Metal-Semiconductor Contacts: Schottky Contacts	159
6.3.1	Metal - Semiconductor Junctions: Theoretical Background	159
6.3.1.1	Charge transport mechanisms in Schottky junctions	165
6.3.1.2	Schottky diode current	166
6.3.1.3	Thermionic emission: Rectification	166
6.3.1.4	Quantum mechanical tunneling	169
6.3.1.5	Field emission and thermionic field emission	169
6.3.2	Other Current Transport Mechanisms	171
6.3.2.1	Generation-recombination effects	171
6.3.2.2	Barrier lowering due to image force effects	172
6.3.2.3	Leakage current	173
6.3.2.4	Barrier height inhomogeneity	174
6.4	Experimental Details	176
6.4.1	Choice Of Material	176
6.4.2	Fabrication Of Al/ p WSe ₂ Thin Film Schottky Diodes	180
6.4.3	Current -Voltage – Temperature Measurements	182
6.4.3.1	Keithley 4200 semiconductor characterization system (SCS)	182
6.4.4	Barrier Height Inhomogeneities	203
6.5	Conclusions	209
	References	214
Chapter 7	Final Remarks And Future Direction	219 - 224
7.1	Final Remarks	219
7.2	Future Direction	223
Appendix I	Research Paper Publications	225
Appendix II	Oral and Poster Presentation of Research Papers in Conferences/ Workshop	226
