ACKNOWLEDGEMENT

In the present research work, I have constructed and standardized a thematic apperception test to measure concern for excellence among the students studying in the high schools.

The research work has been completed without interruptions on account of the invaluable guidance provided by Dr. C.C. Pathak, Head, Department of Education, Sardar Patel University, Vallabh Vidyanagar. I find no enough words to express my thanks adequately to Dr. C.C. Pathak, my guide, who continuously provided feedback to carry on the work with pace and excellence. He has offered me useful suggestions throughout the period, with cheerful visage, words of affection and elegant and lofty discussions as and when necessary.

I extend my gratitude to Mr. Niranjan Danak, who prepared pictures according to my instructions and helped me in the construction of the tool.

I am thankful to the head masters of the high schools who not only welcomed me but also offered me their co-operation by providing facilities for the try-outs and administration of the tool under preparation.
I am also grateful to the professors who were kind enough to give their expert opinions whenever required. I am also thankful to Prin. N.V. Raval and my colleagues who encouraged me and provided facilities to complete the work.

I owe my gratitude to the various authors whose books and articles I consulted during the research work and in the preparation of the thesis.

I cannot but express my thanks to my wife and children who gave full co-operation and inspiration during the tenure of research work.

I am also indebted to the people who have directly or indirectly influenced or helped in the shaping of this thesis.

J.N. Pandya
