CHAPTERS PAGES

PART I

1.	Existing information on TaS ₂ single crystals	01
2.	Experimental techniques	24
3.	Growth and dissolution of crystals	45
4.	Growth of single crystals by a vapour phase method	75

PART II

5.	Growth and characterisation of TaS ₂ single crystals.	95
6.	Microstructures on the as-grown faces of TaS ₂ single crystals.	111
7.	Etching and kinetics of dissolution of TaS ₂ single crystals.	127
8.	Polytypism in TaS ₂ crystals	147
9.	Measurements of electrical properties of 1T-TaS ₂ single crystals.	165

PART III

10.	Transmission electron microscopy - General introduction.	181
-----	--	-----

11.	Electron microscopy of TaS_2 single crystals using weak beam technique.	208
12.	Estimation of stacking fault energy.	225
13.	Transmission electron microscopy of TaS_2 single crystals.	245
14.	Phase transitions as studied by electron diffraction.	264
15.	Variation of lattice parameter 'a' with temperature.	294
16.	Review of the present work	304
