CHAPTER-I
INTRODUCTION AND SCOPE OF THE PRESENT WORK.

1.1 Carbon element and its allotropes

1.1.1 Crystal Structure of Graphite

1.1.2 Fullerene

1.2 Industrial Carbons

1.2.1 Precursors for Industrial Carbons

1.2.11 Fillers

1.2.12 Binders

1.2.13 Impregnate

1.2.14 Additives

1.2.2 Pitches

1.2.2a Coal Tar Pitch

1.2.2b Petroleum Pitch

1.2.2c Characteristics of Pitches

1.2.3 Mesogenic Character of Pitches
1.2.4 Pitch as Binder and Matrix Material in Engineering Materials

   1. Effect on Porosity
   2. Surface Activity of Pitch

I.2.5 Pitch Air-Blowing

1.3. New Forms of Carbon

1.3.1 Carbon as Reinforcement (Carbon Fibers)

1.3.2 Carbon Fiber Composites

1.3.21 Carbon/Carbon Composites

1.4. Processing of Carbon/Carbon Composites

1.4.1 Chemical Vapour Infiltration

1.4.2 Liquid Infiltration/Carbonization Technique

1.5 Reactivity of Carbon

1.6 Reaction Kinetics and Mechanism

1.7 Reaction Rates

1.8 Scope of the Present Work

CHAPTER - II

EXPERIMENTAL

II.1 Introduction

II.2 Introduction to Raw Materials
CHAPTER III
STUDIES ON HEAT TREATMENT OF PITCHES AND THEIR CHARACTERIZATION

III.1 Introduction 91
III.2 Characterization of Raw Unstabilized pitches 93
III.3 Air-stabilization of pitches and their characterization 94
III.3.1 Conversion Yield % 96
III.3.2 Infrared Spectroscopy 99
III.3.3 Pyrolysis behaviour of Modified Pitches 106
III.3.4 Coke Yield % 115
III.3.5 Solubility of Pitches 115
III.3.6 Elemental Analysis 119
III.3.7 Optical Texture 121

CHAPTER-IV
CHARACTERIZATION OF CARBON / CARBON COMPOSITES

IV.1 Introduction 124
IV.2 Characterization of Carbon Fibers 125
V.4.1 Samples used for Oxidation of C/C Composites 163
V.4.2 Oxidation in Dry Air 170
V.4.3 Oxidation in Wet Atmosphere 170

CHAPTER - VI

CONCLUSION 176
