

ACKNOWLEDGEMENTS

It gives me great pleasure to express my sincere gratitude and indebtedness to my research guide, Dr.G.K. Shivakumar, Reader in Physics, at this University for his continued guidance and kind encouragement during the entire tenure of the research programme. It is also a distinct pleasure to thank Mr.G.H.Yousefi and Dr.N.M. Batra for their valuable suggestions, encouragements and also for going through the manuscript with painstaking care.

I am grateful to Professor M.K. Agarwal, Head of the Department for having provided me with excellent laboratory facilities. The timely help received from Professor S.M. Patel (Head, University Science Instrumentation Centre) and his staff during the entire course of this work is acknowledged. Assistance received from Dr. P. D. Prabhawalkar, RSIC, Indian Institute of Technology, Bombay and Dr. K.V. Rao, R & D Lab, Indian Petrochemical Corporation Ltd., Baroda for the structural and chemical analysis is gratefully acknowledged.

Although it is not possible to give individual thanks to so many other members of the teaching staff, office staff and to the colleagues who helped me in

their way, I wish to express my gratitude to all of them at this time.

I am thankful to Sardar Patel University, Vallabh Vidyanagar for providing me this opportunity to carry out my research work.

Thanks are due to Mr. Reghupal who undertook the burden of typing the manuscript promptly and effectively with unflagging cheerfulness.

Lastly, I am extremely pleased to express my sincere gratitude to my parents and my cousin brother, Mr. Mehdi Yousefi for his financial assistance, warm and affectionate encouragement.

R. Rousina.
