

CONTENTS

CHAPTER 1	INTRODUCTION	1
CHAPTER 2	FLUID DISTRIBUTIONS ON PSEUDO SPHEROIDAL SPACE-TIMES-I	
	1. Introduction	12
	2. Pseudo spheroidal space-time metric	13
	3. Matter distribution	15
	4. Law of variation of density	17
	5. Solution of field equations	19
	6. Matching with Schwarzschild exterior metric	22
	7. Superdense star	23
CHAPTER 3	FLUID DISTRIBUTIONS ON PSEUDO SPHEROIDAL SPACE-TIMES-II	
	1. Physical plausibility	26
	2. Dynamic stability	31
CHAPTER 4	CHARGED DUST SPHERES ON PSEUDO SPHEROIDAL SPACE-TIMES	
	1. Introduction	37
	2. Einstein-Maxwell equations	38
	3. Solution of field equations	41
	4. Physical aspects	44

CHAPTER 5	CHARGED FLUID SPHERES ON PSEUDO SPHEROIDAL SPACE-TIMES	
	1. Introduction	47
	2. Solution of field equations	48
	3. Discussion	53
CHAPTER 6	EINSTEIN CLUSTERS ON PSEUDO SPHEROIDAL SPACE-TIMES	
	1. Introduction	59
	2. Florides method	60
	3. A solution for Einstein Clusters	64
CHAPTER 7	ANISOTROPIC FLUID DISTRIBUTIONS ON PSEUDO SPHEROIDAL SPACE-TIMES	
	1. Introduction	68
	2. The field equations	69
	3. Solution of field equations	71
	4. Particular case $K = 2$	75
CHAPTER 8	CORE-ENVELOPE MODELS ON PSEUDO SPHEROIDAL SPACE-TIMES	
	1. Introduction	81
	2. Distributions with anisotropic core	82
	3. Discussion	87

CHAPTER 9	STATIC SOLUTIONS OF EINSTEIN'S FIELD EQUATIONS IN HIGHER DIMENSIONS ON PSEUDO SPHEROIDAL SPACE-TIMES	
	1. Introduction	89
	2. The field equations	90
	3. Solution of field equations	94
	4. discussion	98
CHAPTER 10	NON-ADIABATIC GRAVITATIONAL COLLAPSE ON PSEUDO SPHEROIDAL SPACE-TIMES	
	1. Introduction	100
	2. The interior space-time	101
	3. The exterior space-time	103
	4. Boundary conditions	103
	5. Solution of field equations	108
	6. Physical requirements and thermodynamic relations	110
	7. A particular model for collapsing star	111
	8. Discussion	118
