In recent times, there have been movements for 'liberation of women'. The woman is awakening and the East as well as West is full of enthusiasm on the part of women to come out of the kitchen and take part in public life. There are examples of many great women in different walks of life, in social services, politics and education. There are famous women characters such as the late Prime Minister Smt. Indira Gandhi, former Prime Minister of Sri Lanka Smt. Bandarnaike, Mrs. Golda Meir of Israel, British Prime Minister Mrs. Margarett Thatcher, Mrs. Aquino, President of Philippines, Mrinal Gore, Shalini Tai, U.G.C. Chairman Smt. Madhuriben Shah and Scientist Miss Saxena have come forward. For the common woman, education and health have been the most suitable areas for occupation. Women in education are best suited for the post, yet in a male dominated society and with little past experience women find difficulties in their jobs. This may be due to biological and social factors but research in this direction was the most needed according to the investigator. Hence, the study was undertaken with a view to find out the areas and Role Perspective of women teachers.

The investigator approached some elderly persons and many friends who extended their whole hearted co-operation.
It would be an act of injustice if the investigator does not express a sense of gratitude towards them at this juncture.

It was a privilege for the investigator to work under the able guidance of Dr. J.M. Bhatt, Reader, Sardar Patel University, Vallabhbh Vidyanagar (now retired). The investigator is immensely indebted to him for his guidance, which he rendered most sympathetically throughout this study. But for his inspiration, encouragement and guidance, it would not have been possible for the investigator to complete this task.

The investigator is indebted to Dr. I.A. Vora, Reader, Sardar Patel University, Vallabhbh Vidyanagar for helping and guiding her in the methodology and such technical aspects.

The investigator is thankful to Dr. C.K. Patel, Principal, Anand Education College, Anand and Dr. B.V. Patel, Principal, M.B. Patel College of Education, Vallabhbh Vidyanagar for inspiring her during the study. Their kind enquiries proved a stimulating force.

The investigator cannot forget here, Dr. G.S. Patel, Hon. Secretary, Shri Ram Krishna Seva Mandal, Anand, who was kind enough to allow her for this study.

The investigator would like to extend her thanks to Prof. Lokesh Kaul, Department of Education, Himachal Pradesh University for suggestions.
The investigator is also thankful to Dr. A.R. Parikh, M.B. Patel Science College, Anand and her colleague Dr. R.G. Kothari who helped her a lot in many ways.

The investigator is also thankful to the experts in the field of Sociology, Psychology and Education as well as principals of schools who were kind enough to co-operate in the implementation of the research work.

Shri Javvant C. Christian deserves her thanks for typing the present report neatly and impressively.

Last but not the least due respects are due to her beloved father and mother who inspired her at each and every step of her academic life, especially to complete this research work.

The investigator would not forget the help extended by members of her family and friends - Rajesh, Rakesh, Ramesh, Kishor, Kuljeet, Ragani, Mr. R.D. Mulka, Himanshu and Dr. K.N. Patel, without their help it would not have been possible to complete the work in time.

Lastly the investigator is thankful to all those who have directly or indirectly extended their help.

Vallabh Vidyanagar
