</table>
three groups for Trait Anxiety after 120 days of treatment

5.13 Duncan's Multiple Range Test of difference among mean scores of the three groups for Trait Anxiety after 180 days of treatment

5.14 Anova set-up for the mean scores for Anxiety of the three groups at before and after different phases of treatment

5.15 Duncan's Multiple Range Test of difference among the mean scores of the three groups for the variable Anxiety, before treatment

5.16 Duncan's Multiple Range Test of difference among the mean scores of the three groups for the variable Anxiety after 6 days of treatment

5.17 Duncan's Multiple Range Test of difference among mean scores of the three groups for Anxiety variable after 60 days of treatment

5.18 Duncan's Multiple Range Test of difference among mean scores of the three groups for Anxiety after 120 days of treatment

5.19 Duncan's Multiple Range Test of difference among mean scores of the three groups for Anxiety after 180 days of treatment

5.20 Anova set-up for the mean scores for Depression of the three groups at before and after different phases of treatment

5.21 Duncan's Multiple Range Test of difference among mean scores of the three groups for Depression, before treatment

5.22 Duncan's Multiple Range Test of difference among mean scores of the three groups for the variable Depression, after 6 days of treatment

5.23 Duncan's Multiple Range Test of difference among the mean scores of the three groups for Depression, after 60 days of treatment

5.24 Duncan's Multiple Range Test of difference among the mean scores of the three groups for Depression after 120 days of treatment

5.25 Duncan's Multiple Range Test of difference among the mean scores of the three groups for Depression, after 180 days of treatment

5.26 Anova set-up for the mean scores for Mania of the three groups, at before and after different phases of treatment

5.27 Duncan's Multiple Range Test of difference among the mean scores of the three groups for the variable Mania, before treatment
5.28 Duncan's Multiple Range Test of difference among mean scores of the three groups for the variable Mania, after 6 days of treatment

5.29 Duncan's Multiple Range Test of difference among the mean scores of the three groups for the variable Mania, after 60 days of treatment

5.30 Duncan’s Multiple Range Test of difference among the mean scores of the three groups for Mania, after 120 days of treatment

5.31 Duncan’s Multiple Range Test of difference among the mean scores of the three groups for Mania after 180 days of treatment

5.32 Anova set up for the mean scores for Inferiority of the three groups, at before and after different phases of treatment

5.33 Duncan’s Multiple Range Test of difference among the mean scores of the three groups for Inferiority, before treatment

5.34 Duncan’s Multiple Range Test of difference among the mean scores of the three groups for the variable Inferiority, after 6 days of treatment

5.35 Duncan’s Multiple Range Test of difference among the mean scores of the three groups for Inferiority, after 60 days of treatment

5.36 Duncan’s Multiple Range Test of difference among the mean scores of the three groups for Inferiority, after 120 days of treatment

5.37 Duncan’s Multiple Range Test of difference among the mean scores of the three groups for Inferiority, after 180 days of treatment

5.38 Anova set up for the mean scores for Paranoia of the three groups, at before and after different phases of treatment

5.39 Duncan’s Multiple Range Test of difference among the mean scores of the three groups for Paranoia, before treatment

5.40 Duncan’s Multiple Range Test of difference among the mean scores of the three groups for the variable Paranoia, after 6 days of treatment

5.41 Duncan’s Multiple Range Test of difference among the mean scores of the three groups for the variable Paranoia, after 60 days of treatment

5.42 Duncan’s Multiple Range Test of difference among the mean scores of the three groups for the variable Paranoia, after 120 days of treatment

5.43 Duncan’s Multiple Range Test of difference among the mean scores of...
the three groups for the variable Paranoia, after 180 days of treatment
5.44 Anova set up for the mean scores for Total Maladjustment of the three
groups, at before and after different phases of treatment

5.45 Duncan's Multiple Range Test of difference among the mean scores of
the three groups for Total Maladjustment, before treatment

5.46 Duncan's Multiple Range Test of difference among the mean scores of
the three groups for the variable Total Maladjustment, after 6 days of
treatment

5.47 Duncan's Multiple Range Test of difference among the mean scores of
the three groups for Total Maladjustment, after 60 days of treatment

5.48 Duncan's Multiple Range Test of difference among the mean scores of
the three groups for Total Maladjustment, after 120 days of treatment

5.49 Duncan's Multiple Range Test of difference among the mean scores of
the three groups for Total Maladjustment, after 180 days of treatment

5.50 Anova set up for the mean scores for Intensity of stuttering of the three
groups, at before and after different phases of treatment

5.51 Duncan's Multiple Range Test of difference among the mean scores of
the three groups for Intensity of stuttering, before treatment

5.52 Duncan's Multiple Range Test of difference among the mean scores of
the three groups for Intensity of stuttering, after 6 days of treatment

5.53 Duncan's Multiple Range Test of difference among the mean scores of
the three groups for Intensity of stuttering, after 60 days of treatment

5.54 Duncan's Multiple Range Test of difference among the three groups
for Intensity of stuttering after 120 days of treatment

5.55 Duncan's Multiple Range Test of difference among the three groups
for Intensity of stuttering, after 180 days of treatment

5.56 Anova for the mean scores for different variables, before and along
different phases of treatment in the experimental group
