Acknowledgements

Undertaking research in any field is a very significant step in one's career. For such a study to be successfully completed there are several seen and unseen hands whose assistance is of vital importance.

Language is a poor medium when it comes to expressing thanks to all the people behind the success of the project. However, I take this opportunity to show my appreciation for their help.

I am highly indebted to Dr. Praful A. Patel, Reader, Department of Statistics, Sardar Patel University, Vallabh Vidyanagar, for his inspiration, guidance and cooperation throughout this research work. The expression may be cliched but I must say that he is truly my friend, philosopher and guide.

I must also thank the Charutar Vidya Mandal for giving me permission to take up this study.

I am very grateful to Dr. H. K. Patel who during his tenure as Principal of V.P. and R.P.T.P. Science College, gave me permission for this research and also for his constant encouragement and support.

Prof. H. B. Madhwani deserves special mention because of being very accommodating and cooperative.
I must not forget my teachers at the Department of Statistics, Sardar Patel University for their constant support.

Last but not the least the patience, faith and love shown by my parents, my wife Madhuri and daughter Pooja is what kept me going. They really were there whenever I needed them. Without them this thesis would never have been completed.

Finally, I express my innermost sense of gratitude and gratefulness to GOD almighty.

RAJU CHAUDHARI
