

CONTENTS

	Acknowledgement	ack.
	Preface	Pr.
Chapter 1	Literature survey of MoSe_2 and MoTe_2 single crystals	01
Chapter 2	Growth of single crystals by a vapour phase method	15
Chapter 3	Growth and characterization of the $\text{W}_{1.02}\text{Se}_2$ and $\text{W}_{1.04}\text{Se}_2$ single crystals	35
Chapter 4	Growth and characterization of the $\text{MoSe}_x\text{Te}_{2-x}$ single crystals	51
Chapter 5	Transport properties of the $\text{MoSe}_x\text{Te}_{2-x}$ single crystals	70
Chapter 6	Introduction to photoelectro- chemical (PEC) solar cells	83
Chapter 7	Fabrication, spectral response and flat band potential measurement of PEC solar cells using $\text{MoSe}_x\text{Te}_{2-x}$ single crystals	125

Chapter 8	Effect of iodine concentrations, temperature and light intensity on the performance of PEC solar cells using $\text{MoSe}_x\text{Te}_{2-x}$ single crystals.	138
Chapter 9	Measurement of life-time of minority carriers of the $\text{MoSe}_x\text{Te}_{2-x}$ single crystals	154
Chapter 10	Conclusions and Future scope for further research	164
