ACKNOWLEDGEMENT

It is with great pleasure I extend my deep sense of gratitude to Dr. G.L. Shah, Reader in Botany, Sardar Patel University, Vallabh Vidyanagar, Gujarat for suggesting the problem and under whose able and unfailing guidance the present work has been completed.

I sincerely record my heartfelt thanks:

to Professor J.J. Shah, Head of the Botany department, Sardar Patel University, Vallabh Vidyanagar, for providing all the necessary facilities;

to the authorities of Sardar Patel University for the award of Basic Science Scholarship for the present investigation and to the Bombay Natural History Society, Bombay for travelling grant for botanical excursions;

to Rev. Father H. Santapau and Professor P.V. Bole, St. Xavier's College, Bombay, for allowing me to work in Blatter Herbarium;

to Principal M.B. Raizada, D.A.V. Post-graduate College, Dehradun who has kindly confirmed the identification of grasses;

to my esteemed friends and research colleagues for their valuable help during the tenure of this work;

to the Divisional Forest Officer, Rajpipla and Range Forest Officers, Dediapada and Sagbara, for providing me facilities during outings in the forests;

to the authorities of Government Hospital, Dediapada and Sagbara, for the Meteorological data;

to Mr. Jaswant C. Christian, for typing the thesis.
