DEDICATED
TO
My Spiritual Master

There begins blessings, where worldly words withered. If this work of mine has taken the shape of a miniature step in roaring excellence of true scientific re-search for the benefit of human kind, is due to my most reverent Spiritual master, who constantly guided me with 'HIS ' divinity and unfinished love toward me.

I bow down my head to his holiest lotus feet, my Spiritual master Shri Shri 1008 Swami Shivomtirthiji, Devas, for his unseen, unspoken but ever felt divine help extended throughout this work.

I also feel deep sense of gratitude toward Shri Shri 1008 Swami Madhavtirthji; Anand, for his constant encouragement and boosting up the moral to walk on the very hard pathway of life, with soothing touch of advice. He has scientific vision and practical way of living the life with existing resources.
And also dedicated to

my MOTHER

who started learning just to teach her son,

And

my FATHER

from whom i learned the value of

punctuality and sincerity.
