My thanks are also due to Prof. R.D. Chaodhuri Sr. lecturer in “statistics, V.P. Science College V. V. Nagar. Who personally took pain to make these parameters updated, computing it and preparing concerned graphs with his keen interest that made this work worthwhile.

It is very hard to put in words the efforts and support I received from my beloved students and volunteers who truly followed what I desired, despite of difficulties. I just can not forget the dedication they have shown, never said 'NO' whenever they were called upon even at odd time between 'Dawn to Dusk'. It is their devotion rather then compulsion to participate in this research project. I take note of it and express my vote of thanks to all.

My sincere thanks are also due to Mr. Alpesh Gandhi for providing the protocol printed within very short time.

My wife need no mention in printed words but I would be wrong on my part if I fail to remember the way she followed my instructions, wandered with me from door to door carrying RTM - 608, and
recorded the parameters. She always boosted me up and kept me alert regarding the goal, without her hand in hand I would have not completed this project at this stage of life. I am thankful to Dr. Mrudula Prajapati B.S.A.M. for her co-existence.

I am thankful to my son Arpan (studying in U.S.A.) for his energetic help and zealous approach.

Lastly, I would like to grab this opportunity to remember and show feelings of gratitude to all my teachers who led me on the pathway of true scientific approach right from Kindergarten to College academic career.
