ACKNOWLEDGEMENTS

This study on "Agricultural Development in Rajasthan - The Regional Aspect" is submitted for the award of Ph.D. degree in Economics of the Sardar Patel University. This study is an outcome of the initiative taken by Professor V.S.Vyas, under whose guidance and supervision the present work is completed. The frankness that characterised his criticism and suggestions kept me in good spirits. He has been the most encouraging supervisor and as his pupil I owe him more than what my acknowledgement may convey here. I am grateful to Sri. C.R.Patel, Librarian (now retired), Sardar Patel University, Dr. A. Ray and Dr.A.S.Patel for their help in the preparation of the thesis, which bears on points too numerous to be listed. I also owe much to Professor M.T. Pathak of the Department of Economics, Sardar Patel University and Professor P.N.Misra of the Indian Institute of Management for their perusal of the draft and comments on some of the portions of the thesis as and when approached for their advice. Dr. J.D.Patel took immense pains in the preparation of maps and diagrams for which I extend my sincere thanks. I would also like to thank Sri. R.Indu for his help in the final stage of preparation of the
manuscript. The processing of the data was done at the Computer Centre, Sardar Patel University and I am grateful to all those at the Computer Centre for their help. The most exacting work of typing from an illegible manuscript, a work done so excellently, fell upon Sri B.C.Patel, who performed it with much care and affection despite heavy pressure of work in the discharge of his official duties. I am indeed very grateful to him.
