

<u>CONTENTS</u>		Pages
Acknowledgement	ak. i
Preface	Pr. i
Chapter 1	Existing information on the solid solutions in $\text{MoS}_x\text{Se}_{2-x}$ system ..	01.
Chapter 2	Growth of single crystals by a vapour phase method ..	27
Chapter 3	Growth and characterisation of the $\text{MoS}_x\text{Se}_{2-x}$ single crystals ..	45
Chapter 4	Transport properties of molybdenum sulphoselenides single crystals ..	63
Chapter 5	Introduction to photoelectrochemical (PEC) solar cells ..	76
Chapter 6	A test case study of photoelectrochemical solar cells using n-type natural MoS_2 single crystals ..	113
Chapter 7	Characterisation of molybdenum sulphoselenide - electrolyte interface ..	129

Chapter 8	Effect of iodine concentrations and temperature on the performance of PEC cells based on $\text{MoS}_x\text{Se}_{2-x}$ electrodes	..	141
Chapter 9	Influence of illumination intensity on the performance of PEC cells based on $\text{MoS}_x\text{Se}_{2-x}$ electrodes	..	153
Chapter 10	Surface behaviour and rotating ring-disc electrode studies of $\text{MoS}_x\text{Se}_{2-x}$ electrodes	163
Chapter 11	Photoassisted decomposition of water using molybdenum disulphides	173
Chapter 12	Conclusions	184
