ACKNOWLEDGEMENT

Correct perception may be acquired directly, by correct analysis and by correct reference.

- Verses from Pathanjali Yoga Sutram

The correct perception leads to correct analysis which further refined by the correct inference through the correct guidance to obtain a meaningful concept. In the similar way my research work was perceived, analyzed, and inferred by experts, who needs to be honored through this acknowledgement. My first and foremost thanks to my research supervisor Dr. Swaminathan Sethuraman Ph.D. (Director, CeNTAB) for giving stalwart support throughout my research work. His perseverance, patience and kindness helped me to overcome Himalayan difficulties faced during the entire period of my graduation. He is my source of inspiration for novel thinking and hardworking. His strict orders at sterner days though painful, have helped me to shape my individuality and gave confidence to face the adversity. My heartfelt thanks to Dr. Uma Maheswari Krishnan Ph.D. for shooting several tasks upon me, which revealed out my capability to face tough challenges with self-assurance. Her boundless patience and generous guidance during document improvisation have fetched me laurels in terms of publications. The monumental support provided by Dr. Anuradha PhD. during the final phase of my thesis submission has helped me to wind up my stay well ahead of time. Her dedicated effort and unbound care made me felt the parental mentorship in a technical arena. She always
stood ahead by me as a sister along with Dr. D. Brahadeeswaran during the initial stages of my research career for laying strong foundation.

I sincerely thank my doctoral committee members Dr. Santhosh Sathish MBBS, MD, DM, Cardiology (Head of Cardiology, JIPMER, Pondichery), Dr. N. Senthil Kumar MBBS, MD, Cardiology (Apollo Hospital, Trichy), for their critical evaluation and rendering useful suggestions to improve the quality of my research work.

I am obliged to convey my respect to the Deans, (SCBT) Dr. N. Srivastava Ph.D. and Dr. K. Sridharan Ph.D. for their effortless support during various administrative works. I indeed convey my deep respect and honor for the Deans and Associate Dean (Research) Dr. Sivaramakrishnan Ph.D. Dr. K. Thiagarajan Ph.D. and Dr. R. Chandramouli Ph.D. respectively for their excellent commitment in conducting the technical gathering on schedule.

My heartfelt thanks to Dr. M. Viyalalakshmi Ph.D. (Asscoiate Dean, Bioinformatics) and Dr. K. S. Rajan Ph.D. (Associate Dean, SCBT) for their relentless encouragements from the very first day of my landing till the thesis submission at SASTRA University. My warm gratitude to Dr. Venkatesan Ph.D. and Dr. Rajesh Ph.D. for their technical advice on the high voltage power supply. I thank Dr. Sankaran Ph.D. and Mr. Panner Selvam, (Laboratory assistant) from Mechanical engineering, for their help to set up our own indigenous collectors and electrospinning chambers. I thank Dr. Sridhar Narayan Ph.D. (AstraZeneca Pharmaceuticals) for providing the human umbilical vascular endothelial
cells from their inventory stock. I convey my thanks to Mr. A. Jayaprakash (JEOL, Japan), Mr. Lenin (Microtrack, India), Dr. Z. H. Sholapurwala (Zeonics, Bangalore), Ms. Priya (Eppendorf, Bangalore) and Mr. S. C. V Moorthy (Micrometrics, India) for providing exclusive training on various analytical instruments.

My special thanks to Dr. V. Ramanathan Ph.D. for his critical questioning at various technical meets and for extending his scientific and moral support at time of needy. I thank Dr. Gino A Kurian Ph.D. Dr. S. Philip Antony Ph.D. and Dr. N. Sai Subramanian Ph.D. for their valuable inputs on various occasions. I am grateful to Dr. S. Panchapakesan MVSc. Ph.D. (Coordinator, CAF) and Dr. P. C. Prabhu MVSc, for their constant guidance and support during various technical discussions. I thank Dr. K. S. Ravichandran Ph.D. (Associate Dean, IT) for his boundless support during in silico analysis. My Special thanks to Dr. Venkatraman, Director, Shanmuga Precision Forging for his constant moral support throughout my research program.

I am cheerful to thank all my colleagues and friends of CeNTAB and CARISM for providing friendly and scientific environment thereby to be more productive and constructive. Last but not least all my credits and honor are dedicated to my father Late Mr. K. Sankaran for nurturing me with noble values at right age. I am thankful to my mother Mrs. Uma Sankaran for her support, sacrifice, prayers, blessings, pain taking efforts, sleepless nights, immense care, and ultimate love that fetch me the glorious two letter words before my name “Dr.”
I take this opportunity to thank my dear brother Mr. S. Ganesh Kumar who stood by me as massive support for bearing me at various downfalls. His encouragement and motivation gave rebirth to advanced versions of me to handle several threatening situations meticulously. Intimate thanks to my sister-in-law Mrs. Shoba Ganesh Kumar, for her care, advices, and helps through the entire period of my PhD. Ms. Bhavani Ganesh Kumar, my niece had been my source revitalization and energizer by her cutie and naughty talks with the flavor of unconditional love.

With immense joy and enthusiasm, I express my gratitude to my dear loving partner Mrs. Anusha Krishna Kumar for bearing troubles and loneliness due to my absence on several occasions. She is my one and only rejuvenator to refill my energies all through my research career.

It is all made possible just because of one person who extended himself in the above mentioned names just to make me accomplish this task just like a play of him who is none other than the "GOD". I am surrendering my pride and honor to his divinity.
