PREFACE

 Preface
  Introduction
  Review of Literature
  Material and Methods

CHAPTER I: Taxonomy

1) Oswaldocruzia goezei Skrjabin and Schulz, 1952.
2) Oxysomatium macintoshii Railliet and Henry, 1913.
3) Cosmocercoides rickae Ogden, 1966.
4) Paracosmocerca macronata Kung and Wu, 1945.
5) Meteterakis govindi Karve, 1930.
7) Monhysterides sp. (Baylis and Daubney, 1922).
8) Ascaridia galli (Schrank, 1788) Freeborn, 1923.
9) Raillietnema simples (Travassos, 1923).
10) Thelandros alatus Wedl (1861).

CHAPTER II: Population study

- Number of host species from the study area.
- Diversity of nematodes
- Number of nematode parasites recovered
- Statistical analysis.
- Correlation between weight of host from different localities.

CHAPTER III: Seasonal Variation

- Intensity of infection.
- Sex ratio of host.
- Effect of sex, year, localities and seasons on nematodes.
- Statistical Analysis
Results and Discussions
