ACKNOWLEDGEMENT

I have been supported, influenced and inspired by many whom I would like to acknowledge. First and foremost, this dissertation would have never been accomplished without the valuable instructions, insightful guidance and significant suggestions of my guide Prof. Hameed Khan whose critical insight and sharp knowledge have been a profound source of inspiration of mine during the writing of this thesis. I am particularly indebted to him for his encouragement, support and advice as well.

I am immensely grateful to my virtuous parents and my lovely sisters and brothers for their boundless help and permanent support.

I would like to give my special thanks and gratitude to my beloved husband, Abdurraheem Rageh Al-Radfani, too for his lovely care, unshakable support and constant help.

I would like also to acknowledge my mother-in-law for her motherly care and my close friends, Rehab Shamsan, Amal Sharha, Jehan Ashshamiri, Fairouz Al-Wasei, Jamela Al-Hakimi and Najwa Al-Maqtari, for their sincere friendly assistance.

Special thanks are due to Dr. Mustajeeb Khan, Assistant Professor, English Department, Dr. BAMU, and my dear friend Dr. Shama Khan for their persistent help, encouragement and support.
