ACKNOWLEDGEMENT

The author is profoundly grateful to Dr. S. Natarajan, Professor and Head, Department of Physics, Anna University, Madras for his dynamic guidance, constant encouragement and forbearance throughout this work. The author has found him to be a warm and understanding person, who never forced his viewpoint on others.

Dr. K. Sivakumar, Lecturer in Physics, Anna University, Madras provided the author enthusiastic support throughout the evolution of this thesis. The author's hearty thanks are always due to him.

The author thanks Dr. K. Subramanian, Assistant Professor of Physics, Anna University, for his encouragement and extends his indebtedness to Dr. V. Masilamani, Assistant Professor of Physics, Anna University and Mr. D. Sastikumar, Research Scholar for providing the compounds and for useful discussions in dye lasers.

The author is grateful to Dr. Babu Vargese, Senior Scientific Officer, RSIC, I.I.T, Madras; Dr. W. L. Duax, IUCr CSM secretary; Professor A. Clearfield, Department of Chemistry, Texas A & M University, U.S.A; and Professor H. Manohar and Dr. I. I. Mathews of Department of Inorganic and Physical Chemistry, Indian Institute of Science Bangalore for their help in the intensity data collection.
The author thanks Mr. K. Pius, Research Scholar, Department of Organic Chemistry, Indian Institute of Science, Bangalore, for providing the quantum chemical computer program package and for useful discussions.

The author thanks Dr. D. Velmurugan, Dr. M. N. Ponnuswamy, Lecturers, Department of Crystallography and Biophysics, University of Madras, for their support and encouragement.

The author thanks the Head and staff of the Ramanujam computing centre and the Institute of Remote Sensing, Anna University, for their constant support to carry out the computational work.

The author expresses his deep felt thanks to Mr. S. Easwaramoorthy and K. Panneerselvam, Research Scholars, Department of Crystallography and Biophysics, University of Madras and Mr. R. Radhakrishnan, Research Scholar, Department of Physics, Indian Institute of Science, Bangalore for their constant help during his research tenure.

The author thanks the members of the faculty and Mr. S. Ganesan, Mr. S. Arumugam, research scholars and other research scholars of the Department of Physics, Anna University for their friendliness.

Mere words cannot express the author's gratitude to his parents whose love and good wishes have always been with him throughout his career.

The financial support from the UGC is gratefully acknowledged.
