LIST OF TABLES

Table 1.1 Overview of the studies made by different authors
Table 3.1 Dimensions of primary nozzles
Table 3.2 Dimensions of secondary nozzles having inlet tube, mixing tube and diffuser tubes with 19.0 mm mixing tube diameter
Table 3.3 Dimensions of secondary nozzles having inlet tube, mixing tube and diffuser tube with 14.9 mm and 22.5 mm mixing tube diameter
Table 3.4 Properties of conveying materials
Table 3.5 Typical Observation of experimental readings with different S values.
   \[ L_1 = 55.0 \text{ mm}; \quad L_m = 180.0 \text{ mm}; \]
   \[ L_0 = 105.1 \text{ mm}; \quad d_m = 19.0 \text{ mm}; \]
   \[ d_p = 10.0 \text{ mm}; \quad \dot{m}_a = 1.764 \text{ kg/min}. \]
   material : wheat
Table 3.6 Dimensions of secondary nozzles (convergent - divergent)
Table 4.1 Experimental values of \( \dot{m}_p \) and \( \dot{m}_a \) and different geometric parameters of secondary nozzle having inlet tube, mixing tube and diffuser tube for the preliminary equation for wheat
Table 4.2 Different polynomials with the respective regression coefficients and coefficients of correlation for different sets of \( L_1, L_m, L_0, d_m, d_p \) and \( \dot{m}_a \).
