ACKNOWLEDGMENTS

The author is highly indebted to Professor V. Subramaniam for guiding him throughout the course of the study and for inculcating in him the correct spirit of mind, and way of thinking.

The author is extremely grateful to Drs. K. Padmanabhan and S. Natarajan who, as members of the Doctoral Committee offered valuable help.

The author wishes to thank M/s Lakshmi Machine Works Ltd., for giving him permission to work with a pilot model of their Rotor Spinner. The author also wishes to thank Mr. K.P.R. Pillai for the technical assistance he provided.

The help of Prof. K. Jayachandran who provided access to the Kawabata Bending Tester is gratefully acknowledged.

The author wishes to thank the various colleagues who helped him in many ways, particularly Drs. A. Peer Mohamed and M. Mudhusoothanan.

The author is thankful to the various members of his family for the encouragement and support they provided.
