1. General Introduction 01-09

2. Changes and induction in the aminopeptidase activity after fungal infection during germination of pigeon pea seeds 10-29

3. Induction of leucine aminopeptidases-like activity in response to wounding and methyl jasmonate in pigeon pea leaves 30-51

4. Alterations in the Helicoverpa armigera midgut digestive physiology after ingestion of pigeon pea inducible leucine aminopeptidase and Bacillus thuringiensis Cry1Ac toxin 52-73

5. Biochemical characterization of soluble aminopeptidases from the midgut of Helicoverpa armigera 74-91

6. Differential responses of midgut soluble aminopeptidases of Helicoverpa armigera to feeding on various host and non-host plant diets 92-110

7. References 111-130

8. Publications 131-133
