ACKNOWLEDGEMENT	iii
ABSTRACT	iv
1 INTRODUCTION	
1.1 Objective	1
1.2 Historical Review	2
1.2.1 Starting bases	3
1.2.2 Crashing Techniques	5
1.2.3 Multiple Column Selection	6
1.2.4 Suboptimization	7
1.2.5 Multiplex Method	8
1.2.6 A Polynomial Algorithm in Linear Programming	8
1.3 Motivation	9
1.4 Conclusion	12
2 LINEAR PROGRAMMING AND ALGORITHMS	
2.1 Introduction	13
2.2 Revised Simplex Procedure	15
2.2.1 Algorithm	15
2.2.2 Transformation Matrix	22
2.2.3 Preservation of Linear Independence Property	25
2.3 Revised Simplex Procedure Using the Variant	29
2.4 Crash Algorithms	30
2.5 Multiple Column Selection Algorithm	31
2.6 Multiplex Method	33
2.7 A Polynomial Algorithm in Linear Programming	34
2.8 Conclusion	35

3	MULTIPLEX ALGORITHM	
3.1	Introduction	37
3.2	Approach	37
3.3	Multiple Column Selection Procedure	41
3.3.1	Multiple Column Selection	41
3.3.2	Geometrical Interpretation of the ' θ ' Matrix	44
3.3.3	Mathematics of the Methods	47
3.3.4	Methods of Multiplex Algorithm	52
3.4	Algorithm	57
3.5	Feasibility	65
3.6	Dual Simplex Method	67
3.7	Dual Multiplex Algorithm	69
3.8	Comparison of the Revised Simplex and Multiplex Algorithms	70
3.9	Conclusion	76
4	MULTIPLEX ALGORITHM FOR BOUNDED VARIABLES	
4.1	Introduction	77
4.2	Revised Simplex Method and Bounded Variable Problem	77
4.2.1	Feasibility Criterion	80
4.2.2	Bounded Variable Algorithm	83
4.3	Multiplex Algorithm and Bounded Variable Problem	84
4.3.1	Selection Procedure	84
4.3.2	A Version of the Dual Multiplex Algorithm	87
4.3.3	Step by Step Procedure	90
4.4	Conclusion	94

5	NUMERIC EXAMPLES TO ILLUSTRATE MULTIPLEX ALGORITHM	
5.1	Introduction	95
5.2	Criteria for Selecting Variables	96
5.3	Experience in Application	97
5.4	Numeric Examples	100
5.5	Basis for Comparison	136
5.6	Conclusion	142
6	SOME ADDITIONAL COMPUTATIONAL ASPECTS	
6.1	Introduction	143
6.2	The Problem	144
6.3	Minimization of Popping Variables	146
6.3.1	Criterion Employed	146
6.3.2	Alternate Selection Criterion	149
6.3.3	Selection Based on Non-competing Variables	151
6.3.4	Method Based on Resource Level	153
6.4	Redundant Constraints	153
6.5	Step by Step Algorithm	154
6.6	Examples	155
6.6.1	Minimizing Reentry of Variables	155
6.6.2	Inference from the Frequency Diagram	165
6.6.3	Example to Illustrate Alternate Selection Criterion	166
6.6.4	Example to Illustrate the Method of Selection Based on Non-competing Variables for the same Resource	167
6.6.5	Example to show the Selection Based on Resource Level	169
6.6.6	Deducting Redundant Constraints	171
6.7	Cycling	173
6.8	Conclusion	177

7	SOFTWARE TO IMPLEMENT THE ALGORITHM	
7.1	Introduction	178
7.2	Subroutines and their Functions	179
7.2.1	Subroutines of the Multiplex Algorithm	179
7.2.2	Subroutines of the Revised Simplex Algorithm	182
7.2.3	Subroutines for the Multiplex Bounded Algorithm	184
7.2.4	Subroutines for the Simplex Bounded Algorithm	185
7.3	Experiences in Programming	185
7.4	Conclusion	186
8	CONCLUSIONS	187
