

LIST OF FIGURES

Figure	Page No.
1.1 Chain structure of SbSBr	3
2.1 Bridgman apparatus	16
2.2 Czochralski apparatus	18
2.3 Verneuil apparatus	18
2.4 Solution growth apparatus	20
2.5 Gel growth apparatus	23
2.6 Piper and Polich apparatus	30
2.7 Closed tube system	30
2.8 Open tube system	31
3.1 Phase diagram of $\text{BiI}_3\text{-Bi}_2\text{O}_3$ system	36
3.2 Two zone furnace	40
3.3 Powder X-ray diffractogram of BiOI crystals	42
3.4 TGA of BiOI crystals	43
3.5 SEM of BiOI crystals	44
3.6 Phase diagram of $\text{SbI}_3\text{-Sb}_2\text{O}_3$ system	46
3.7 TGA of $\text{Sb}_5\text{O}_7\text{I}$ crystals	50
3.8 Variation of specific heat with temperature for $\text{Sb}_5\text{O}_7\text{I}$ crystals	51
3.9 DSC of $\text{Sb}_5\text{O}_7\text{I}$ crystals	52
3.10 AsOI crystals	54
3.11 Powder X-ray diffractogram of AsOI crystals	55
3.12 DSC of AsOI crystals	56
3.13 Variation of specific heat with temperature for AsOI crystals	57
3.14 TGA of AsOI crystals	58
3.15 Powder X-ray diffractogram of BiOCl crystals	61

3.16	Optical micrographs of multiple growth of BiOCl crystals	63
3.17	Optical interferogram of BiOCl crystals	63
3.18	Variation of ϵ' with frequency for BiOCl crystals	64
4.1	Phase diagram of BiI ₃ -Bi ₂ Te ₃ system	69
4.2	Single crystals of BiTeI	77
4.3	Powder X-ray diffractogram of BiTeI crystals	72
4.4	DSC of BiTeI crystals	73
4.5	Variation of electrical conductivity with temperature (Nguyen Tat Dich et al 1978)	74
4.6	Variation of ϵ' and σ_{ac} of BiTeI crystals with frequency	76
4.7	Single crystals of SbTeI	77
4.8	DSC of SbTeI crystals	78
4.9	TGA of SbTeI crystals	79
5.1	Powder X-ray diffractogram of BiSeI crystals	83
5.2	Temperature profile of source zone	85
5.3	Schematic diagram of dielectric cell	90
5.4	Variation of ϵ' with temperature at f=1,10 and 100 KHz for BiSeI crystals	95
5.5	Variation of ϵ' and $\tan\delta$ with temperature for BiSeI crystals at f=1KHz	96
5.6	Variation of ϵ' and σ_{ac} with temperature for BiSeI crystals at f=10 KHz	97
5.7	Variation of ϵ' and σ_{ac} with temperature for BiSeI crystals at f=100 KHz	99
5.8	Variation of ϵ' with frequency for BiSeI crystals at f=1-1000 KHz	100
5.9	DSC of BiSeI crystals	102
5.10	Variation of specific heat with temperature for BiSeI crystals	103

6.1	XPS spectrum of BiTeI crystals: a survey scan	108
6.2	XPS spectrum of BiTeI crystals showing C1S level at 284 eV	109
6.3	XPS spectrum of BiTeI crystals showing Bi4F levels at 158 eV and 163.5 eV	111
6.4	XPS spectrum of BiTeI crystals showing Bi4D level at 440 eV	112
6.5	XPS spectrum of BiTeI crystals showing Te3D levels at 574.75 eV and 585.5 eV	113
6.6	XPS spectrum of BiTeI crystals showing I3D levels at 617.5 eV and 629.25 eV	115
6.7	XPS spectrum of BiTeI crystals showing O1S level at 529.75 eV of the oxygen impurity	117
6.8	XPS spectrum of SbTeI crystals : a survey scan	118
6.9	XPS spectrum of SbTeI crystals showing C1S level at 283 eV	119
6.10	XPS spectrum of SbTeI crystals showing Sb3D levels at 529.5 eV and 538.5 eV	121
6.11	XPS spectrum of SbTeI crystals showing Te3D levels at 571.75 eV and 582.5 eV	122
6.12	XPS spectrum of SbTeI crystals showing I3D levels at 618.25 eV and 629.75 eV	123
6.13	XPS spectrum of Sb ₅ O ₇ I crystals: a survey scan	126
6.14	XPS spectrum of Sb ₅ O ₇ I crystals showing C1S level at 291.5 eV	127
6.15	XPS spectrum of Sb ₅ O ₇ I crystals showing Sb3D levels at 536.75 eV and 546.25 eV; O1S level at 527.5 eV	128
6.16	XPS spectrum of Sb ₅ O ₇ I crystals showing I3D levels at 625.0 eV and 636.5 eV	129
