ACKNOWLEDGEMENT

I am indebted to many who have contributed towards successful completion of my thesis work. I sincerely record my gratitude to them.

It is my pleasure to thank Prof. R. Asokamani for his eminent guidance in the present work. As a philosopher and mentor he has channelized my thinking to have better insight in the subject. His unique and systematic way of approach towards the problem has broadened my perspective of science. I gratefully acknowledge him for encouraging me not only in research but also in community developing activities.

I thank the head of the department Prof. Mohanadoss and all the staff members for their encouragement.

I express my thanks most sincerely to Dr. Mrs. Elizabeth Thomas, Secretary and Correspondent, C.T.T.E. College for women, for permitting me to pursue research. My thanks are also due to Dr. Mrs. Prema Rufus, Principal and my colleagues at C.T.T.E. College for their co-operation during the period of my study.

I am very grateful to Dr. O.K. Andersen, Stuttgart and Dr. G.P. Das, Dr. Ashok Ariya and Dr. Hemanth of BARC, Mumbai for the useful discussions I had with them during my stay at SERC school, Calcutta which led to better clarity in the present work.
It is my duty to acknowledge gratefully the timely help I received from my fellow researchers Mr. P. Vajeeston, Mrs. Geetha, Dr. Mrs. Mercy, Mr. C. Ravi and Mr. Thair.

I owe a great deal of appreciation and gratitude to Mr. Rajkumar Roberts and family, Ms. Rani Roberts and team, Mrs. Abraham and Ms. Susan Abraham for upholding me through prayers and words of encouragement. I am grateful to Mr. John Abraham who stood as a spiritual and moral support towards the completing stage of the work. His silent but sincere contributions enabled the speedy completion of the thesis.

My sincere thanks which may not find adequate words to express are due to my beloved parents Capt. D. B. Rufus and Dr. Mrs. Prema Rufus for their continuous support. In fact it is their prayers and sacrifice that has brought me to this level in life. My thanks are also due to my loving sisters Mrs. Priya and Ms. Rebecca who encouraged me to pursue research. Their care and concern towards me has augmented my strength in many ways. Above all I thank the Lord Almighty for his mercy and never ending grace which enabled me to complete the thesis in time. I dedicate myself and the present thesis to Him.

RITA RUFUS
