LIST OF FIGURES

1. Chain structure of SbSI (Figure 1.1)
2. Clinographic projection of the unit cell (Figure 1.2)
3. Interatomic distances in the coordination polyhedran around Sb, Se and I (Figure 1.3)
4. Clinographic projection of the coordination polyhedran around the Sb atom that corresponds to the Sb of Figure 1.2 (Figure 1.4)
5. Impurity distribution (Figure 2.1)
6. Single zone furnace and its temperature profile (Figure 2.2)
7. Modified Bridgman furnace and its temperature profile (Figure 2.3)
8. Bridgman-Stockbarger profile (Figure 2.4)
9. Various shapes at the tip of the crucible (Figure 2.5)
10. Shape of the tip of the crucible used (Figure 2.6)
11. Solid-Liquid-Crucible intersection (Figure 2.7)
12. Bridgman set up (Figure 2.8)
13. Temperature profile of the single zone furnace (Figure 2.9)
14. Modified Bridgman temperature profile used for growing SbSI crystals (Figure 2.10)
15. Modified Bridgman temperature profile used for growing SbSeI crystals (Figure 2.11)
16. Growth habits of SbSeI crystal (Figure 2.12)
17. Temperature profile of the single zone furnace (Figure 3.1)
18. Temperature profile with fluctuations and without fluctuations (Figure 3.2)
19. SbSI ingot (single bundle) (Figure 3.3)
20. Temperature profile with fluctuations (Figure 3.4)
21. Experimental arrangement for electrical conductivity measurements (Figure 4.1)
22. Cryostat (Figure 4.2)
23. The plot of log (σ) against 1000/T for SbSI (Figure 4.3)
24. The plot of log (σ) against 1000/T for SbSI (Figure 4.4)
25. The plot of log (σ) against 1000/T for SbS0.8S0.2I (Figure 4.5)
26. The plot of log (σ) against 1000/T for SbSeI (Figure 4.6)
27. Temperature dependence of electrical conductivity of SbSI (low temperature region) (Figure 4.7)
28. Leitz microhardness tester (Figure 5.1)
29. Indentations made on SbSeI platelet (Figure 5.2)
30. Indentations made on SbSeI ingot (Figure 5.3)
31. Variation of microhardness with load (Figure 5.4)
32. log P against log d plot (Figure 5.5)
33. d^n against d^2 plot of SbSI (Figure 5.6)
34. d^n against d^2 plot of SbSeI (Figure 5.7)
35. log (P-W) against log d plot (Figure 5.8)
