ACKNOWLEDGEMENT

The author expresses immense depth of gratitude to her research supervisor Prof. P. Ramasamy, Director, Crystal Growth Centre, for suggesting the problem in research, his inspiring guidance and scholarly advice to carry out the present investigation.

The author would like to thank Dr. P. Santhanaraghavan, Anna University, Prof. R. Dhanasekaran, Prof. C. Subramanian, Prof. T. Nagarajan, Dr. J. Kumar and other faculty members of Crystal Growth Centre for their support. The author is extremely grateful to her research collaborators Dr. K. Srinivasan, Alagappa University and Dr. R. Gopalakrishnan, Anna University.

The author is extremely thankful for the help rendered by Prof. T. C. Goel, Dr. A. K. Tripathi, Dr. H. D. Sharma, IIT Delhi, Dr. K. N. Srivastava, LASTEC, Delhi, Prof. S. P. Sengupta, IACS, Kolkata, Dr. G. Bocelli, CSSD, Italy, Dr. G. Salvatii, Italy, Dr. K. Miki and Dr. A. Ando, ETL, Japan in characterisation studies. The help of Prof. M. Palanichamy, Anna University and my doctoral committee members Prof. A. Narayanasamy and Dr. K. Hariharan is gratefully acknowledged.

The author expresses her sincere thanks to all research scholars of Crystal Growth Centre for their kind support. The author is grateful to CSIR for the award of senior research fellowship. The author places on record her profound gratitude to her parents, grand parents, brother and sister whose constant encouragement and help were the guiding spirit behind this work.
