ACKNOWLEDGEMENT

The author expresses his deep sense of gratitude to his research supervisor Dr. R. Jayavel, Assistant Professor, Crystal Growth Centre, for his concerted guidance and courteous personal attention while this licentiate work was performed.

The author is extremely grateful to Prof. C. Subramanian for scholarly advice, sharing his valuable ideas and constant encouragement. His moral encouragement and profound good wishes stirred the author to achieve this milestone.

The author is grateful to Prof. R. Dhanasekaran, Director, CGC, and Prof. P. Ramasamy former Director of CGC. The author is thankful to Dr. Murugakoothan and Dr. D. Prabhakaran for their scientific association. The author expresses his wholesome gratitude to Dr. Antonio Vecchionne and Prof. S. Pace, University of Salerno, Italy for providing research fellowship. Profound thanks are to Dr. M. Gombos, Dr. Mateo and Ms. D. Sisti, Italy for their support. The author is thankful to Dr. T. Endo, Associate Professor, for his scientific association. Further, the author would like to thank all the faculty and members of CGC in particular Mr. E. Srinivasan and Dr. P. Jayavel. The author is grateful to his friends M. Ashok, R. Muralidharan, E. V. Rajan, S. Mades, V. Kannan, M. Subramanian, P. Thangadurai, M. Arif and Sig. Laura for having shared their time during this investigation.

The author thanks Govt. of India, for the award of senior research fellowship. Finally, the author is thankful to the Almighty for having blessed him wonderful parents and sister, who have been very supportive during the course of this work.
