ACKNOWLEDGEMENT

I thank the Almighty for His grace in making me undertake and complete this research work.

I express my sincere gratitude to my philosopher and guide, respected and beloved Prof. Dr. V. Sankaranarayanan, former Director, Ramanujan Computing Centre and Chairman, Faculty of Information and Communication Engineering, Anna University. When research seemed eternally prolonged, there was always my guide to fish me out, constantly guiding, encouraging and motivating me, just like a pole star guiding a mariner at sea to safety. He was with me throughout the research work.

I thank Dr. V. Rhymend Uthariaraj, Assistant Professor, Ramanujan Computing Centre, for being kind enough to accept the charge of supervisor on the superannuation of Prof. Dr. V. Sankaranarayanan.

I am highly thankful to our Vice Chancellor Prof. Dr. E. Balaguruswamy for providing me with excellent infrastructure facilities for research.

I am indebted to Prof. Dr. A. Mathialagan, Former Director, Madras Institute of Technology (MIT), Prof. Dr. V. Ramachandran, Professor, School of Computer Science and Engineering, Anna University, and Prof. Dr. M. Balakrishnan for functioning as my doctoral committee members and their valuable suggestions and
insight, pointed out to me by them during the meeting, which offered me the bearing
in the right direction for my research work.

I am indebted to Prof. Dr. R. Nagarajan who encouraged me during the
research work. I am also thankful to Dr. A. George for his advice and help.

I am thankful to other researchers for their invaluable contributions in this
field, which was the source of motivation for me to take up research in this field.

I am also thankful to my family members for their support.

I am thankful to Mr. Pintu Lohia and Mr. P. G. Ramasubramaniam for their
help.
