List of Figures iv
List of Tables vi
List of Algorithms viii
Glossary x
Abstract xii

1. Introduction 1
  1.1. Motivation and Objective ........................................... 5
  1.2. Contribution of Thesis ............................................. 5
  1.3. Organization of Thesis ............................................. 6

2. Theoretical Background 7
  2.1. Introduction ......................................................... 7
  2.2. Routing in WSN ..................................................... 7
  2.3. Routing Protocols ................................................... 9
    2.3.1. Location Based Protocols ..................................... 9
    2.3.2. Data Centric Protocols ....................................... 10
    2.3.3. Hierarchical Protocols ....................................... 10
    2.3.4. Mobility Based Protocols .................................... 12
    2.3.5. Multipath Based Protocols ................................... 13
    2.3.6. Heterogeneity Based Protocols ............................... 13
    2.3.7. QoS Based Protocols ......................................... 14
  2.4. Design Parameters of a WSN ...................................... 14
  2.5. Coverage in WSN .................................................. 15
    2.5.1. Issues with Coverage in WSN ................................ 15
      Coverage types ................................................... 15
      Deployment .................................................... 16
      Node types .................................................... 16
Contents

Constraints ................................................. 16
Dimensional coverage .................................. 17

2.5.2. Approaches to Coverage in WSN ................... 17
Art Gallery problem ..................................... 17
Voronoi diagram and Delaunay triangulation .......... 17
Disjoint sets .............................................. 18

2.6. Connectivity in WSN .................................. 19

2.6.1. Connectivity Issues in WSN ....................... 19
Sparse amount of nodes .................................. 19
Physical damage to nodes ................................ 19
Network security threat .................................. 19
Energy depletion of nodes ................................ 20
Environmental changes .................................. 20
Mobile nodes ............................................. 20

2.6.2. Solution to Connectivity in WSN ................. 20

2.7. Multiple Sinks ........................................ 21

2.7.1. Multiple Sinks Placement ......................... 23

2.8. Radio Model ......................................... 23

2.9. Summary .............................................. 25

3.1. Introduction ......................................... 29

3.2. Clustering ............................................ 29

3.3. Wireless Environment Monitoring System ........... 33

3.3.1. Architecture of the Proposed System ............. 33

3.3.2. Cluster Head Selection ............................ 34

3.3.3. Data Transmission from the Sensor to the Sink .. 37

3.3.4. Data Aggregation .................................. 37

3.3.5. Simulation and Results ............................ 38

3.4. Clustering using Sensing Range .................... 39

3.4.1. Cluster Head Determination ....................... 40

3.4.2. Data Transmission from Sensor to Sink .......... 41

3.4.3. Merging ............................................ 42

3.4.4. Simulation and Results ............................ 42

3.5. Summary .............................................. 43
## Contents

7.4. Summary ................................................................. 89

8. Conclusion ................................................................ 91
  8.1. Summary of Contributions ......................................... 91
  8.2. Future Work ............................................................. 93

References .................................................................. 94

List of Publications ..................................................... 109

Biodata ....................................................................... 115
