ACKNOWLEDGEMENT

The author is deeply indebted to Dr. V. Subramaniam for his valuable guidance and encouragement during the course of this research.

He wishes to thank his Doctoral Committee members, Dr. S. Sivakumaran and (Late) Prof. B. Jagannadhaswamy for their help and suggestions in the course of this study.

The author is greatly thankful to Dr. K. M. Thiagarajan, Chairman and Managing Director, Loyal Textile Mills, for his generosity in providing the samples of ring and rotor spun yarns used in the study. He would like to thank the faculty members, in particular, Dr. A. Peer Mohamed, Dr. M. Madhusoothanan and Mr. N. Selvakumar, for their help.

Grateful thanks are due to Prof. K. Jayachandran, Head, Department of Textile Technology, PSG College of Technology, Coimbatore for permitting him to use the KES-F bending tester.

The author is thankful to Mrs. Sandhya Uddavan for editing the text of the thesis. Thanks are due to his friends and family members.

Finally, the financial assistance given by the Council of Scientific and Industrial Research (CSIR), New Delhi, in the form of Senior Research Fellowship to pursue this piece of investigation is gratefully acknowledged.
