ACKNOWLEDGEMENT

The author wishes to record his deep sense of gratitude to his research supervisor Dr. R. Sakthivadivel, Director, Centre for Water Resources, Anna University, Madras for his invaluable guidance, fruitful discussions and constant encouragements. The author sincerely thanks Dr. K. Elango, Professor, Department of Civil Engineering, Indian Institute of Technology, Madras, Dr. M.S. Jegadeesan, Professor, Department of Geology, University of Madras, Madras and Dr. M. Arunachalam, Assistant Professor, Department of Mathematics, College of Engineering, Anna University, Madras for their help as members of the Doctoral Committee.

The author expresses his gratitude to Prof. K.R. Rushton, University of Birmingham, U.K. for his valuable guidance and discussions. The supports extended by the British Council Division, Madras, the University Grants Commission, New Delhi, and Anna University, Madras for the author to visit the University of Birmingham, U.K. under ALIS programme and to work there in the area of groundwater engineering are gratefully acknowledged. Thanks are due to the Department of Civil Engineering, the University of Birmingham which provided the necessary facilities to the author during the visit.

The author wishes to express his thanks to the members of Staff of the Centre for Water Resources who have helped him in one way or other in completing this work early. The services rendered by the staff of the Computer Centre, Anna University in running the computer programs are acknowledged with thanks.
The author thanks the Public Works Department and the Agricultural Engineering Department of the Government of Tamilnadu, and the Madras Metropolitan Water Supply and Sewerage Board, Madras for having made available to him the data of the Minjur-Panjetty aquifer system.

Finally the author appreciates the immense help rendered by his daughter Geetha and son Jayaraman in the preparation of the thesis.
