

TABLE OF CONTENTS

CHAPTER NO.	TITLE	PAGE NO.
	ABSTRACT	iii
	LIST OF TABLES	xvii
	LIST OF FIGURES	xix
	LIST OF ABBREVIATIONS	xxvii
1	INTRODUCTION	1
1.1	SAMPLE PREPARATION FOR ANALYSIS	1
1.2	CONVENTIONAL EXTRACTION TECHNIQUES	3
1.2.1	Liquid-liquid extraction	3
1.2.2	Soxhlet extraction	3
1.2.3	Steam distillation	4
1.2.4	Ultrasonic extraction	4
1.3	RECENTLY DEVELOPED MODERN EXTRACTION METHODS	5
1.3.1	For solid samples	5
1.3.2	Pressurized Liquid Extraction	6
1.3.3	Supercritical Fluid Extraction	7
1.3.4	Microwave Assisted Extraction (MAE)	9

CHAPTER NO.	TITLE	PAGE NO.
1.4	SAMPLE-PREPARATION TECHNIQUE FOR LIQUID SAMPLES	10
1.4.1	Solid-phase extraction (SPE)	10
1.4.2	Cartridge and disc formats	12
1.4.3	SPME	14
1.5	MICROWAVE-ANALYTICAL TECHNIQUE	16
1.5.1	Earlier literature on MW technique employed for the analytes investigated	17
1.5.2	Theory	21
1.5.3	Concept of super heating	22
1.5.4	Classification of Microwave equipments	24
1.5.5	Principal elements of a microwave device (Instrumentation)	24
1.5.6	Open-vessel microwave units	26
1.5.7	Advantages of focused (open) vessel MW technique	26
1.5.8	Limitations	28
1.5.9	Important experimental parameters to develop a procedure	28
1.5.10	Solvent selection	29
1.5.11	Temperature	31
1.5.12	Extraction duration	32
1.5.13	Solvent Volume	32
1.5.14	Matrix characteristics and water content	33

CHAPTER NO.	TITLE	PAGE NO.
	1.5.15 Development of different MW based sampling techniques for organic analytes	34
	1.5.16 Focused microwave-assisted Soxhlet extractor	34
	1.5.17 Microwave-assisted distiller	35
1.6	THE HAZARDOUS NATURE OF CHLORO ORGANIC COMPOUNDS	36
1.7	CHLOROPHENOLS	37
1.8	POLYCHLORINATED BIPHENYL (PCB)	41
1.9	CHLOROBENZENES	43
1.10	HEXA CHLORO HEXANE	44
1.11	DESCRIPTION OF THE SEPARATION TECHNIQUES FOLLOWED	44
	1.11.1 The columns	45
	1.11.2 Open tubular columns	45
	1.11.3 The detector	46
	1.11.3.1 Linearity	46
	1.11.4 Electron capture detector	47
1.12	HPLC TECHNIQUE	47
	1.12.1 High-pressure pumps	48
	1.12.2 Sample injection system	49
	1.12.3 The column	50
	1.12.4 Detectors for HPLC	50

CHAPTER NO.	TITLE	PAGE NO.
	1.12.5 Ultraviolet -Visible detectors or photometric detectors	51
1.13	CAPILLARY ELECTROPHORESIS	52
1.14	REVIEW OF LITERATURE FOR THE ANALYSIS OF ORGNOCHLORO COMPOUNDS UNDER INVESTIGATIONS	54
1.15	SCOPE OF THE PRESENT RESEARCH WORK	55
2	SOLVENT- FREE AQUEOUS EXTRACTION OF CHLOROPHENOLS FROM SOME SOLID MATRICES	59
2.1	BASIS OF THE APPROACH	59
2.2	EXPERIMENT	60
	2.2.1 Reagents	60
	2.2.2 Equipments	61
	2.2.3 Preparation of soil sample	62
	2.2.4 Other solid sample preparation	63
	2.2.5 Soxhlet Extraction	63
	2.2.6 MAE with aqueous carbonate	64
2.3	RESULTS AND DISCUSSION	65
	2.3.1 Influence of Carbonate strength	65
	2.3.2 Optimisation of MAE	66
	2.3.3 SPE clean up for HPLC	69
	2.3.4 SPE cleaning for GC analysis	70
	2.3.5 Recoveries of chlorophenols by aqueous MAE	71

CHAPTER NO.	TITLE	PAGE NO.
	2.3.6 Analysis of samples (real and spiked)	72
2.4	ANALYTICAL TECHNIQUES FOLLOWED	75
	2.4.1 HPLC analytical conditions	75
	2.4.2 GC-ECD analytical conditions	76
	2.4.3 Capillary electrophoresis	80
	2.4.3.1 Cyclodextrin electrokinetic chromatography	80
3	EXTRACTION AND ENRICHMENT OF PCBs, CHLOROBENZENES AND HCH INTO A THIN LAYER OF A LOW-DIELECTRIC SOLVENT ASSISTED BY WATER	84
	3.1 BASIS OF THE METHOD	84
	3.2 EXPERIMENT	87
	3.2.1 Equipments	87
	3.2.2 Extractions of samples	88
	3.2.2.1 Preparation of Soil Sample	88
	3.2.2.2 Preparation of other solid samples	89
	3.2.2.3 Extraction of solids	89
	3.2.2.4 The alternate extraction method by MAE employing higher volume of the solvent (n-octane)	89
	3.2.2.5 Soxhlet extraction	90
	3.2.2.6 Preparation of liquid samples	90
	3.2.2.7 Liquid-Liquid Extraction	91

CHAPTER NO.	TITLE	PAGE NO.
3.3	RESULTS AND DISCUSSION	92
3.3.1	Selection of solvent for enrichment of PCBs	92
3.3.2	Optimisation of MAE for the extraction of PCBs and other chloro organo compounds	92
3.3.2.1	Solid samples	92
3.3.2.2	Liquid samples	97
3.3.3	Influence of volume of aqueous phase	100
3.3.4	Influence of volume of extracting solvent	103
3.3.5	Influence of weight of the sample	105
3.3.6	Analysis of samples (real and spiked) and comparison of the data obtained by other methods	107
3.4	ANALYTICAL SEPARATION OF PCBs	109
3.4.1	GC Instrumental conditions for PCBs	109
3.4.2	GC Instrumental conditions for chlorobenzenes and HCH	109
4	ONE-POT DERIVATISATION, EXTRACTION AND ENRICHMENT OF CHLOROPHENOLS INTO A THIN LAYER OF A LOW-DIELECTRIC SOLVENT ASSISTED BY WATER	115
4.1	BASIS OF THE METHOD	115

CHAPTER NO.	TITLE	PAGE NO.
4.2	EXPERIMENT	118
4.2.1	Equipments	118
4.2.2	Reagents	118
4.2.3	Reference standard solution of a mixture of chlorophenols	118
4.2.4	Preparation of soil sample	118
4.2.5	Other solid sample preparation	119
4.2.6	Extraction of solids	119
4.2.7	Alternate extraction method by MAE employing higher volume of the solvent (n-octane)	119
4.2.8	Soxhlet Extraction	120
4.2.9	Preparation of liquid samples by MAE	121
4.2.10	Liquid-Liquid Extraction	121
4.3	RESULTS AND DISCUSSION	122
4.3.1	Selection of n-octane for this extraction	122
4.3.2	Optimisation of MAE of chlorophenols from solid samples	123
4.3.3	Optimisation of MAE of chlorophenols from aqueous samples	128
4.3.4	Variation of recoveries of isomers in the extractions	133
4.3.5	Duration of derivatisation	136
4.3.6	Influence of varying concentration of derivatising agents	137

CHAPTER NO.	TITLE	PAGE NO.
	4.3.7 Influence of variation of volume of the aqueous phase	137
	4.3.8 Influence of varying volume of solvent trap	139
	4.3.9 Influence of weight of the sample on the recovery of analytes	139
	4.3.10 Analyses of samples (real and spiked)	141
4.4	ANALYSIS BY GAS CHROMATOGRAPHY	143
	4.4.1 Instrumental conditions for chlorophenols	143
5	RAPID, ONE-POT DERIVATISATION AND DISTILLATION OF CHLOROPHENOLS; AND DISTILLATION OF PCBs, DCB, HCB AND HCH FROM SOLID SAMPLES WITH THEIR ON-LINE ENRICHMENT	146
5.1	BASIS OF THE METHOD	146
5.2	EXPERIMENT	149
	5.2.1 Equipments	149
	5.2.2 Reference standard solution of a mixture of chlorophenols	149
	5.2.3 Reagents	150
	5.2.4 Preparation of soil sample	150
	5.2.5 Other solid sample preparation	151
	5.2.6 MASD of chlorophenols from solid samples	151
	5.2.7 MASD for Aroclors, chlorobenzenes and HCH	152

CHAPTER NO.	TITLE	PAGE NO.
5.3	RESULTS AND DISCUSSION	152
5.3.1	Optimisation of MASD distillation	152
5.3.2	Optimisation for chlorophenols	154
5.3.3	Optimisation for PCBs (Aroclors 1248 and 1260)	154
5.3.4	Optimisation for other chloro organics	155
5.3.5	Dwelling time	161
5.3.6	Optimisation of derivatisation of chlorophenols	161
5.3.7	On-line enrichment by a liquid trap	162
5.3.8	On-line enrichment by solid sorbent trapping	164
5.3.9	Comparison of recoveries by different reverse phase sorbent (SPE) materials	165
5.3.9.1	For chlorophenols	165
5.3.9.2	For PCBs	168
5.3.9.3	For chlorobenzenes and HCH	168
5.3.10	Influence of weight of sample	169
5.3.11	The significance of sample to aqueous extractant ratio	169
5.3.12	Analysis of samples (Real and Spiked)	172
5.4	ANALYSIS BY GAS CHROMATOGRAPHY	
5.4.1	Column oven conditions for PCBs (Aroclors 1248 and 1260)	174 175

CHAPTER NO.	TITLE	PAGE NO.
	5.4.2 Column oven conditions for DCB, HCB and HCH	175
	5.4.3 Column oven conditions for chlorophenols	175
6	SUMMARY AND CONCLUSIONS	179
