## Acknowledgement

Completing this thesis was quite possibly the hardest thing I have ever accomplished in my short life, and could not have been completed without the help of the people around me. First and foremost, I have to thank my Mom and Dad, who never stopped believing that I could do this, despite all the obstacles that I encountered.

“Inspiration and Motivation always plays a key role in the success of any project.” I am one of those fortunate students whose path is enlightened by expertise and competent guidance of Dr. C. H. Gill, my research guide.

To my guide, who had to put up with me during this entire process and who never, ever gave up on me, even when it became apparent that I was going way over the time it usually takes to complete a Ph.D. thesis. Thank you, Dr. Gill, for your encouragement and support and for agreeing to meet with me every week, even when I had nothing to report. You taught me to never give up, and that progress was progress, no matter how small or insignificant it initially felt. Dr. Gill, you were the one who helped me hammer out exactly what I wanted to find out, and gave me direction when I was merely flailing about with a halfformed theory. Dr. Gill, you were a constant inspiration, and gave me confidences boost whenever we spoke about my thesis. I wish to carry his good human nature along with me in addition to the chemistry that he taught me.

It is my privilege to thank my teachers Dr. B. R. Arbad, Professor and Head, Department of Chemistry, Dr. M. S. Shingar, Dr. R. A. Mane, Dr. T. K. Chondekar, Dr. M. K. Lande, Dr. Mrs. A. S. Rajbhoj, Mr. S. R. Sonone and other faculty members Dr. B. B. Shingate, Dr. S. T. Gaikwad, Dr. S. G. Shankarwar, Smt. G. M. Bondle and Dr. B. R. Sathe, Smt. A. S. Chavan for their valuable suggestions in my research work at the Department of Chemistry, Dr. Babasaheb Ambedkar Marathwada University.

I consider myself bless that I got great friends like Rohan Erande and Kailash Pawar who always help me, encouraged me throughout my work.

To my best friends, Manisha Bhosale, Pravin Shinde, Pravin Mahajan and Mukesh Nikam, who helped me in various ways, which enabled me to complete the research work successfully and without their support this research work would have been a tough task to fulfill. They taught me that sometimes you need to stop worrying about what you’re writing and just write, and for always picking me up when I was at my lowest.

To my close friend Prajakta Deshpande, I cannot thank you enough for your encouragement and support; it came at just the right time to give me that extra lift I needed to finally finish writing.

I am very much thankful to all non-teaching staff of Department of Chemistry for the help extended by them throughout the work.

It is impossible to express my sense of gratitude for Gill Madam, and Reema Didi in mere words. The love and affection of these people has been not less than that of my family. I thank them for all that they have done for me.

No words would suffice if I have to thank my parents; brothers Suryakant, Amol, and Govind; sister Parvati and brother in law Mr. Sominath, who has been at my side through both the highs and the lows. Without your constant support and love, I never would have made it through.

Finally I thank the Almighty for giving me the strength and the determination to keep going with my chin up whenever I faced hardships in my life.
