This study would not have been materialized without the constant support of Dr. Joshi, Dr. Bhagwat, and their team from Sahyadri Hospital Blood Bank, Pune, and all those countless blood donors of Pune.

I am grateful to Dr. M. Biswas and Ms. R. Das for their critical comments, which helped me in improvising my manuscripts and thesis. I would like to acknowledge the help extended by my colleagues, Mr. N. Ojha (NIV), Mr. P. Devhare (NIV), Mr. S. Chatterjee (NIV), and Ms. S. Kumari (NCCS).

I extend my gratitude to my entire family who stood by me through thick and thin. The entire experience had been an eventful one. Several of them taught, “What should be done”, while others taught, “What shouldn’t be done”. I am glad that I saw both the sides of this coin.
