<b>Abstract</b>	<b>xxii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Seasonal Cycle . . . . .	4
1.1.1 Winter . . . . .	4
1.1.1.1 Thermocline ridge . . . . .	4
1.1.2 Spring and Fall . . . . .	5
1.1.3 Summer . . . . .	5
1.2 Intraseasonal Oscillation . . . . .	7
1.2.1 Atmospheric ISOs . . . . .	7
1.2.1.1 MJO . . . . .	7
1.2.1.2 Submonthly ISOs . . . . .	8
1.2.2 Oceanic response and feedback . . . . .	8
<b>2 Data and Model description</b>	<b>11</b>
2.1 Introduction . . . . .	11
2.2 Data used for background conditions of intraseasonal events . . . . .	11
2.3 Data sets used for Surface intraseasonal signals . . . . .	12
2.3.1 Air-sea flux products . . . . .	13
2.4 Model Framework . . . . .	16
2.4.1 Model Physics . . . . .	16
2.4.1.1 Equations . . . . .	17
2.4.2 Physical aspects of the Model . . . . .	17
2.4.2.1 Initial Conditions . . . . .	17
2.4.2.2 Boundary Conditions . . . . .	18
2.4.3 Model setup for Indian Ocean . . . . .	19
2.4.3.1 Control run . . . . .	19
2.4.3.2 Sensitivity Experiments: . . . . .	19

<b>3</b>	<b>Characteristics of intraseasonal events in the Southwestern Tropical Indian Ocean during winter</b>	<b>21</b>
3.1	Introduction . . . . .	21
3.2	Data and Methodology . . . . .	22
3.2.1	Data Sets . . . . .	22
3.2.2	Methodology:-Model Experiments . . . . .	23
3.3	Background Atmospheric and Oceanic Conditions . . . . .	24
3.4	Air-sea surface flux processes . . . . .	28
3.5	Evidence of dynamic response of MJO in Local ecology . . . . .	34
3.6	Summary and Discussions . . . . .	36
<b>4</b>	<b>Processes controlling the surface temperature signature of the Madden-Julian Oscillation in the thermocline ridge of the Indian Ocean</b>	<b>37</b>
4.1	Introduction . . . . .	37
4.1.1	Influence of internally generated wave . . . . .	38
4.1.2	Modulation by interannual subsurface variability . . . . .	38
4.2	Modeling approach towards winter ISO and data . . . . .	39
4.2.1	Data and methods . . . . .	39
4.2.1.1	Validation data sets . . . . .	39
4.2.1.2	Data sets to estimate MJO surface signals . . . . .	39
4.2.2	Modeling approach . . . . .	40
4.2.2.1	Control experiment . . . . .	40
4.2.2.2	Forcing for sensitivity experiments . . . . .	40
4.2.2.3	Sensitivity experiments . . . . .	41
4.2.2.4	Estimate of the contribution of various processes . . . . .	43
4.2.2.5	Quantification . . . . .	43
4.2.3	Model Validation . . . . .	44
4.2.3.1	Intraseasonal forcing . . . . .	44
4.2.3.2	Vertical stratification in the TRIO . . . . .	45
4.2.3.3	Simulated intraseasonal SST . . . . .	46
4.3	Observed intraseasonal variability in the thermocline ridge, 1999-2008	46
4.3.1	Typical amplitude and phase of perturbations . . . . .	47
4.3.2	Air-sea fluxes on the origin of the SST perturbation . . . . .	50
4.3.3	Turbulent processes on the origin of the SST perturbation . . . . .	51
4.3.4	Ekman pumping on the origin of the SST perturbation . . . . .	52
4.3.5	Influence of interannual variability . . . . .	52
4.4	Processes controlling the SST signature of the MJO . . . . .	53

4.4.1	Overall influence of fluxes / oceanic processes . . . . .	53
4.4.2	Year to year variations of fluxes/oceanic processes . . . . .	53
4.4.3	Slab mixed-layer approach . . . . .	55
4.4.4	Influence of shortwave and latent heat fluxes . . . . .	55
4.5	Control by interannual variability of the thermocline . . . . .	57
4.5.1	Interannual modulation . . . . .	57
4.5.2	Processes of interannual modulation . . . . .	57
4.5.3	Temperature jump across the base of the mixed layer . . . . .	59
4.6	Summary and Discussion . . . . .	59
4.6.1	Model biases . . . . .	60
4.6.2	Comparison between model / observational results . . . . .	61
4.6.3	Comparison with other studies . . . . .	61
<b>5</b>	<b>Understanding the processes associated with the intraseasonal Sea Surface Temperature variability in the Northern Indian Ocean during summer</b>	<b>63</b>
5.1	Introduction . . . . .	63
5.1.1	Relevance of summer ISO . . . . .	63
5.1.2	Review of previous studies . . . . .	64
5.1.3	SST variability in Arabian Sea . . . . .	65
5.2	Data and Model . . . . .	67
5.2.1	Data . . . . .	67
5.2.2	Modeling approach . . . . .	68
5.2.3	Estimate of the contribution of various processes . . . . .	68
5.2.4	Quantification . . . . .	69
5.3	Background simulated oceanic structure and summer intraseasonal SST variability . . . . .	70
5.3.1	Background oceanic structure in June-September . . . . .	70
5.3.2	Intraseasonal atmospheric forcing and SST signature . . . . .	72
5.4	Observed surface signature of the summer ISO . . . . .	74
5.4.1	Large scale patterns . . . . .	74
5.4.2	Mechanisms of the oceanic response . . . . .	76
5.5	Processes of modeled 30-90 day SST variability during June-September	79
5.6	Summary and Discussion . . . . .	82
5.6.1	Summary . . . . .	82
5.6.2	Discussion . . . . .	84

<b>6</b>	<b>Regional impact of the interannual variation in intraseasonal events of the Southern Tropical Indian Ocean</b>	<b>87</b>
6.1	Introduction . . . . .	87
6.1.1	Surface chlorophyll studies over STIO . . . . .	87
6.1.2	Studies on Regional impact by STIO variability . . . . .	89
6.2	Impact on local ecology . . . . .	90
6.2.1	Observed variability of chl-a in STIO region and associated physical environment . . . . .	90
6.2.1.1	EEIO region . . . . .	91
6.2.1.2	TRIO region . . . . .	92
6.2.2	Physical processes controlling ecology using Model experiments	93
6.3	Impact on the following monsoon . . . . .	96
6.3.1	Summary and Discussion . . . . .	99
<b>7</b>	<b>Study the modulation of diurnal cycle in the MJO associated intraseasonal events in the TRIO region.</b>	<b>101</b>
7.1	Introduction . . . . .	101
7.2	Data and Modeling approach towards diurnal cycle . . . . .	103
7.3	Observed diurnal cycle in a moored buoy over TRIO and Model validation . . . . .	104
7.4	Quantification of the diurnal cycle modulation . . . . .	107
7.5	Discussions regarding diurnal experiments . . . . .	110
<b>8</b>	<b>Conclusions and Future Scope</b>	<b>112</b>
8.1	Conclusions . . . . .	112
8.2	Future Scopes . . . . .	114
