ACKNOWLEDGEMENTS

Research is a challenging enterprise needing consistent hard work, unhindered dedication and constant consultation. Successful completion of the task is often due to the fact that one has been fortunate in the individuals with whom he has been associated. I have been blessed in this regard and owe much of my esteemed and venerable guide, Prof. S. K. Gakhar, Director, Centre for Biotechnology. He’s the great advisor and one of the smartest people I know. I hope that I could be as lively, enthusiastic, and energetic as Prof. S. K. Gakhar and to someday be able to command the students as well as he can. I pulled courage to attempt this work only because of the unreserved encouragement, his willful and astute guidance, constructive and helpful suggestions, unflinching support, valuable criticism and generous appreciation which have been a constant source of immense inspiration which enabled me in my endeavors to successfully complete this work.

I render my sincere thanks to my Co-supervisor, Prof. A. P. Dash, Regional advisor, Vector-Borne and Neglected Tropical Diseases (VBN), World Health Organization, New Delhi.

I record with immense gratitude and thanks to Prof. S. N. Mishra, Dean, Faculty of Life Science, M. D. University, Rohtak, for his timely advices, constant encouragement and immaculate suggestions throughout my research work.

I must not from expressing my deep sense of gratitude to technical-staff of NIMR, New Delhi for their kind attitude and help. I am also thankful to all non-teaching staff of Centre for Biotechnology for their co-operation during my research work.

I am also grateful to Scanning Electron Microscopy facility, AIIMS, New Delhi for SEM, The Centre for Genomic Application, New Delhi for sequencing facility.

I must confess that completion of my thesis have been impossible without the blessing, emotional support and exceptional encouragement by my respected and loving parents and in-laws. The debt I owe to them can never be repaid in full. I am profoundly grateful to my husband, Randutt Kataria, and my sister and Jiya Ji, Aman and Omdutt Kataria, my children Chunnu, Maanu and Anshuman, who always provide me with required emotional strength to cope with the mental strains I experienced during this period, Mere words cannot express my thanks to them.

I am thankful to Dr. Amita Suneja, Dr. Vipin Sharma (my seniors), Ashwani and Arvind for their support and help. I am also thankful to my colleagues from Department of Genetics for their moral support.

My friends deserve special thanks for their help and moral support. The financial assistance provided by DBT, University is also gratefully acknowledged.
