ACKNOWLEDGEMENT

An intellectual Activity is rarely a solo performance, especially when the work of the researcher is presented in a thesis form.

It is my conviction that life is a team work. Nobody lives in complete isolation and we accomplish nothing without the input and encouragements of those around us. Although I have asserted that the work presented in this thesis is entirely my own, it is a delight to acknowledge here the important contributions that many people have made over the past few years which has allowed me to be where I am today.

First of all, I would like to offer my heartfelt Salutations at the lotus of the God the Almighty, who blessed me with the ability and courage to get over the obstacles in my way, to move ahead and face the challenges of life and successfully complete this work.
