CONTENTS

S.NO. CHAPTER PAGE NO
1. INTRODUCTION 1-18
2. REVIEW OF LITERATURE 19-63
  2.1 Genotoxicity in animals (in general) 20-39
  2.2 Genotoxicity in amphibians 40-63
3 MATERIALS AND METHODS 64-75
  3.1 Materials 65-66
    3.1.1 Selection of model animal 65
    3.1.2 Systematic position of the test frog species 65-66
    3.1.3 Collection and maintenance of the frog specimens 66
    3.1.4 Test chemical used 66
  3.2 Methodology 66-75
    3.2.1 Preparation of chemicals 66-67
    3.2.2 Method for cytological preparation 67-69
      3.2.2.1 Procedure 60
      3.2.2.2 Chromosome banding methods 68-69
    3.2.3 Scanning and Photomicrography 69
    3.2.4 Photokaryotype preparation 69
    3.2.5 Morphometric analysis 69-70
    3.2.6 Preparation of Histogram and Idiogram 70
    3.2.7 Estimation of LC50 value of test chemicals 71
    3.2.8 Experimental design 71-72
    3.2.9 Genotoxicity assays 72-74
      3.2.9.1 Chromosomal aberration test (CAT) 72
      3.2.9.2 Micronucleus test (MNT) 73
      3.2.9.3 Mitotic index (MI) 74
    3.2.10 Statistical analysis 75
4 OBSERVATIONS 76-116
  4.1 Cytogenetic analysis of the test species 76-78
4.1.1 Chromosomal observations from male specimen of *Euphlyctis cyanophlyctis* 76-77
4.1.2 Chromosomal observations from female specimen of *Euphlyctis cyanophlyctis* 77-78
4.1.3 Observations of differential banding in *Euphlyctis cyanophlyctis* 78
4.2 Genotoxicity analysis 78-116
4.2.1 Chromosomal aberrations test (CAT) and mitotic index (MI) 78-103
4.2.2 Micronucleus test (MNT) 103-116
5 DISCUSSION 117-165
5.1 Effects of heavy metals as environmental genotoxicants on amphibians 118-121
5.2 Amphibians, as sentinel organisms for environmental genotoxicity 121-133
5.3 Frog as genotoxic model 122-126
5.4 Genotoxicity of heavy metals and mechanism of their genotoxic effects 126-133
5.5 Discussion on present observations 133-165
5.5.1 Chromosomal aberration test (CAT) and mitotic index (MI) 133-152
5.5.2 Micronucleus test (MNT) 152-165
6 SUMMARY 166-174
7 BIBLIOGRAPHY 174-225
8 APPENDIX
