## Chapter 2: Factors Influencing Bone Status in Premenarchal Girls

<table>
<thead>
<tr>
<th>Figure</th>
<th>Description</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1</td>
<td>Distribution of girls as per Tanner staging in the two age groups</td>
<td>58</td>
</tr>
<tr>
<td>2.2</td>
<td>Increase in mean TBBMC with age</td>
<td>62</td>
</tr>
<tr>
<td>2.3</td>
<td>Increase in mean TBBA with age</td>
<td>62</td>
</tr>
<tr>
<td>2.4</td>
<td>Sunlight exposure in the study population</td>
<td>64</td>
</tr>
<tr>
<td>2.5</td>
<td>Dietary intakes of study population as percent Recommended Dietary allowances</td>
<td>66</td>
</tr>
<tr>
<td>2.6</td>
<td>Biochemical deficiencies in the study population</td>
<td>68</td>
</tr>
<tr>
<td>2.7</td>
<td>Educational status of parents</td>
<td>70</td>
</tr>
<tr>
<td>2.8</td>
<td>Occupational status of the parents</td>
<td>70</td>
</tr>
<tr>
<td>2.9</td>
<td>Bone parameters of girls according to Tanner stage</td>
<td>73</td>
</tr>
<tr>
<td>2.10</td>
<td>Adjusted mean TBBMC across Vitamin D categories</td>
<td>74</td>
</tr>
<tr>
<td>2.11</td>
<td>Association of vitamin D and sunlight exposure</td>
<td>75</td>
</tr>
</tbody>
</table>
### Chapter 3: Comparison of Bone Status in Premenarchal Girls with Respect to Socioeconomic Status and Puberty

| Figure 3.1 | Prevalence of under-nutrition in the study population | 85 |
| Figure 3.2 | Distribution of girls as per Tanner stage in the two socioeconomic groups | 85 |
| Figure 3.3 a | Age wise percent increase in TBBMC in the two groups | 88 |
| Figure 3.3 b | Age wise percent increase in TBBA in the two groups | 88 |

### Chapter 4: Efficacy of One Year Supplementation of Calcium, Vitamin D and Zinc on Bone Health of Premenarchal Girls

| Figure 4.1 | Consort Diagram for intervention trial | 98 |
| Figure 4.2 | Distribution of girls as per Tanner stage in the three groups at baseline and endline | 104 |
| Figure 4.3 | Activity pattern of the study population at baseline and endline | 105 |
| Figure 4.4 | Percent change in serum Ionized calcium and Parathyroid hormone concentration post intervention | 109 |
| Figure 4.5 | Post intervention unadjusted percent increase in bone parameters in the three groups | 111 |
| Figure 4.6 | Post intervention adjusted percent increase in bone parameters in the three groups | 111 |
| Figure 4.7a | Shift in the distribution pattern of TBBMC from baseline in the three groups post intervention | 113 |
| Figure 4.7b | Shift in the distribution pattern of TBBA from baseline in the three groups post intervention | 113 |
Chapter 5: Effect of Calcium and Zinc Supplementation on Height Velocity of LSES Premenarchal Girls vs. Unsupplemented HSES Girls

Figure 5.1 Distribution of girls as per Tanner stage in the three intervention groups and their age matched controls at baseline and endline

Figure 5.2 Change in height-for-age Z scores in supplemented and unsupplemented girls

Figure 5.3 Comparison of age-wise median whole year height velocity with other published references

Figure 5.4 Comparison of age-wise mean whole year height velocity with other published references

Chapter 6: Risk Factors for Low Bone Status in Women above 40 Years of Age

Figure 6.1 Bone health status based on T scores as defined by WHO

Figure 6.2 Interpretation of DXA scan for lumbar spine and femur

Figure 6.3 Prevalence of osteopenia and osteoporosis at Lumbar spine

Figure 6.4 Prevalence of osteoporosis and osteopenia at dual femurs

Figure 6.5 Sunlight exposure (sun-index) in pre and postmenopausal women

Figure 6.6 Energy and macronutrient intakes as percent RDA in the study population

Figure 6.7 Micronutrients intakes as percent RDA in the study population
Figure 6.8  Percent prevalence of biochemical deficiencies in the study population  160

Figure 6.9  Percent prevalence of lipid abnormalities in the study population  160

Figure 6.10 Association of Vitamin D status across sun index categories  163

Figure 6.11 Percent prevalence of osteopenia and osteoporosis with respect to sun light index.  163

Figure 6.12 Changes in BMD at three sites with menopausal stage  164
